

**Preventive and
corrective
maintenance**

With parts sourced from other suppliers, there is no certainty that these parts will have been designed and manufactured to cope with the stressing and safety requirements that will be made of them. Use only original spares and wearing parts (this also applies to standard parts).

Do not make any alterations, installations or modifications to the machine without getting permission from the manufacturer first, otherwise the user's authority to operate the equipment could be void.

Replace immediately any components that are not in perfect condition.

When ordering spare parts, please state the exact designation and the relevant part number, as given in the spare parts list. Please also quote the serial number of your machine.

**Notes on
identification
requirements for
radio appliances**

The RCU 5000i remote control panel is equipped with an RFID (Radio Frequency Identification) module. This RFID module enables wireless, contact-free data transmission using the transponder card. The data are transmitted by way of a magnetic field.

In the USA, RFID modules are subject to FCC identification requirements:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC ID: QKWRF5000I
