USER'S MANUAL

2.4GHz CORDLESS PHONE
CALL WAITING ON CALLER ID

CL-3269IDW / MC-931

Thank you for purchasing this cordless telephone, one of the high-quality products of our company. To obtain optimum performance, be sure to read this manual carefully before starting operation and keep it for future reference.

Before Initial Use

Please read **IMPORTANT SAFETY INSTRUCTIONS** on pages 21~22 before use. Read to understand all instructions.

Accessories

First carefully remove your phone from the giftbox. In addition to the cordless handset, charger base, each carton contains the following accessories:

AC Adaptors (One)

Telephone line cord (One)

User's Manual (One)

Battery(One)

9. Do not overload wall outlets and extension cords as this can result in the risk of fire or electric shock.

10. Never introduce objects into this unit through the slots as there is a risk of fire or electric shock hazard. Never spill any liquid on the unit.

11. To reduce the risk of electric shock, do not disassemble this unit. Instead, take it to a qualified service station for checking. Operating or removing covers may expose you to dangerous voltages or other hazards. Incorrect repair jobs can be highly dangerous.

12. Unplug this unit from the wall outlet and refer servicing to qualified service personnel under the following conditions:

- A. When the power supply cord or plug is damaged.
- B. If liquid has been spilled over the unit.
- C. If the unit has been exposed to rain or water.
- D. If the unit does not work normally upon following the instructions. Adjust only controls covered by the operating instructions, to correct malfunctions and repairs by service technicians extensive.
- E. If the unit has been dropped or damaged.
- F. If the unit exhibits a distinct change in performance.

13. Avoid using the phones during a lightning storm. There may be a remote risk of electric shock from lightning.

14. Do not use the phones to report a gas leak nearby.

15. Use 26AWG telephone line only.

Important safety instructions

When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury to persons, including the following:

1. Read to understand all instructions in the operation manual
2. Follow all warnings and instructions marked on this unit
3. Unplug this unit from wall outlets and telephone jacks before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for the job.
4. Do not use this unit near water, for example, near a bath tub, wash bowl, kitchen sink. If the unit comes in contact with any liquid, cut the power and unplug cords immediately. Do not reconnect the unit before totally dried.
5. Put this unit securely on a stable surface. Serious damage may result from falling.
6. Do not cover slots and openings of the unit, they are needed for ventilation and protection against overheating. Never place the unit near hot places where proper ventilation is not provided.
7. Use only the correct voltage marked on the unit.
8. Do not place objects on the power cord. Put the unit where no one can step on the cord.

IMPORTANT SAFETY INSTRUCTIONS

for Best Performance Battery Charge

To power the handset, install the battery and charge it about 24 hours before initial use.

Operating Distance/Noise

Calls are transmitted between the base unit and the handset using wireless radio waves. For maximum distance and noise operation, the recommended base unit should be located is:

Away from electrical appliances, such as a TV, PC or another cordless phone.

In a HIGH and CENTRAL location away from obstructions such as walls.

IN USE indicator: After pressing **TALK/ST-BY** button, the **TALK** will show on the LCD, indicating that the unit is in use mode.

REPEAT marking: If the call comes repeatedly, when reviewing the call, the **RPT** will turn on the right upper of the LCD.

Battery low indicator: If the battery is low, the **BATT LOW** will show on the LCD.

Message waiting: When somebody leaves messages in the mail box, the **MSG** will turn on the right upper of the LCD. it can be cancelled from the telephone company's signal.

BEFORE USING

6. To Change or Replace a Speed Dial Number

To change or replace a stored number in the speed dial memory enter the new number and store it in the memory location you want to change.

B. Pause function

Allows you to insert a temporary pause during dialling sequence, for example, dialling an international number (eg: 011-886-22-795). Some telephone company systems will not register the entire number entry without a pause between the prefix numbers. You may hold dial 011- **RD./P**, dial 886 - **RD./P**. This allows adequate timing for the phone number to register with the telephone company's system to complete the call.

C. To make a call

1. Press the **TALK /ST-BY** button and wait for a dial tone.
2. Dial your desired number and start your conversation.

To receive a call

To receive a call just pick up the handset when it is in the base station cradle or press any key when it is not in the base station cradle.
