Creation date: August 2017

Limited Liability

The software, software content and accessible services of this device belong to a third party and are protected by copyright, patent fees, trademarks and/or other laws governing intellectual property. The third party content or applications have been created and are owned by third parties which are not related to Mobiwire SAS. The content and the services are provided only for private usage and not for commercial purpose. You must not use the content or the services without explicit authorization of the content owner or the service provider/rights holder. Without limiting the foregoing, it is not allowed to adapt, copy, republish, transfer, publish, communicate, translate, sell, exploit or distribute in any way neither the software content nor the services/applications offered by third parties integrated into the device without explicit authorization of the content owner or service provider concerned.

The content and services of third parties are adopted and provided as « they stand » To the extent allowed by local law, Mobiwire SAS does not take any responsibility, not explicit neither implicit, regarding the content and services provided.
Mobiwire SAS does not provide any explicit or implicit warranties, including but not limited to any warranty of merchantability and adequacy for a particular purpose. The manufacturer is not guarantying the exactitude, the validity, the actuality, the legality and the circumstantially of the content or services integrated in the device provided by third parties and cannot be held responsible in any case, including negligence, contractual liability or tortious liability, direct or indirect damage, accessories, special or consecutive lawyers' fees, fees or any other damage resulting from the usage of the content or the services by yourself or a third party (or by any information being mentioned in this aforesaid content or services), even though the manufacturer had been

informed of the eventuality of the occurrence of damages.

In case that certain countries do not authorise the disclaim of implicit warranties or the limitation of consumer rights, it is possible that those disclaimers and limitations do not apply in your case.

Services provided by a third party can be suspended or interrupted at any moment, and the manufacturer does not guarantee that a certain content or service stays available during a specific period of time. The content and the services are transmitted by third parties via the network and transmission equipment which are beyond the manufacturer's control.

Without this limiting the general information of this present statement, the manufacturer disclaims explicitly all responsibility in case of interruption or suspension of any content or services provided for this device by a third party. The manufacturer cannot be held responsible for the customer service related to the content or the services.

All questions or service requests referring to the content or the services have to be directed directly to the suppliers of the content or the services concerned.

Downloading an album via the multimedia player can induce a modification or an alteration of this album. Downloading an album without authorisation can fall under copyright and/or intellectual property of an artist. The manufacturer is not liable in case of any committed infractions regarding copyrights and intellectual property resulting by the user downloading an album via the multimedia player. The user has to assure that the album licence is authorising him to download and potentially modify the album.

User advice

Numerous applications need a permanent connection to the internet. We advise you to subscribe to a tariff plan adapted to your usage in order to avoid additional costs.

In case of uncertainty, do not hesitate to contact your network operator.

For your safety

These instructions are for you and your entourage safety. Please read the following points attentively.

General safety instructions

	Do not use the device near gas stations.
	Make sure to position the product at least 0.5 cm away from your body.
	This mobile phone can emit a bright or flashing light.
	Be aware of the risk of suffocation because of small parts contained in the mobile phone.
	Keep the device away from heat sources and do not charge near inflammable material as the handset can become hot and create a fire hazard.
	This device can emit a sound at high volume.
	Keep your device away from magnetic objects.
	Avoid placing the device directly over pacemakers, be sure to keep it 15cm away from pacemakers and other medical equipment.
	Do not use this device at extreme temperatures [minimum -10°C and maximum +50 °C].
	Follow any restrictions. Switch the device off in hospitals and medical buildings if the usage is not authorized.
	Follow any restrictions. Switch the device off in airplanes or airports if the usage is not authorized.
	Never try to disassemble this unit. Unauthorized repairs may invalidate the device's warranty.

	Switch off the device should you be in an explosive area or near explosive substances.
	Only use this device with the original battery and accessories.
	Do not use the device while driving a vehicle.

Exposure to radio frequency (RF)

General declaration on radio frequency energy

Your device is a radio transmitter and receiver. When your device is switched on, it receives and transmits radio frequency. When you use the device for communicating, the system managing your call is also managing the emission power of radio frequencies.

Specific Absorption Rate (SAR)

THIS DEVICE IS COMPLIANT WITH ALL INTERNATIONAL DIRECTIVES CONCERNING EXPOSURE TO RADIO WAVES

Your mobile phone is a transmitter and a receiver of radio signals. This device has been designed to be compliant with the limits of recommended exposure by international guidelines. These directives have been established by the scientific and autonomous organisation ICNIRP and include a security range of tolerance in order to assure the protection of all people independent on their age or health.

These directives employ a unit of measurement known as the Specific Absorption Rate (SAR) The SAR limit for mobile phones is 2 W/kg when the phone is used against the head. The highest SAR value for this mobile phone tested* is 0.691 W/Kg against the head and 1.477 W/kg at 0.5cm from the body. As the mobile phone offers several possibilities, it can be used in others positions and in particular close to the body**.

The Specific Absorption Rate is evaluated by conducting standardises methods with the phone transmitting at its highest certified power level in all used frequency bands. The real rate of this mobile phone is generally inferior to the measurements indicated above. This is due to automatic changes of the power level in order to only use the minimal power to communicate with the network. *These tests are compliant with the standards EN50 360, EN 50 566, EN 62 209-1 and EN 62 209-2.

**Refer to the chapter related to the usage close to the body.

Usage close to the body

The device is compliant with all applicable safety requirements concerning exposure to radio frequency, directives when the device is positioned 0.5 cm away from the body. When not following these directives, you are taking the risk of exposure to radio frequency exceeding the appropriate limits.

Limitation of exposure to electromagnetic areas

The World Health Organisation (WHO) advises to limit exposure to electromagnetic areas: To date, no adverse health effects have been established as being caused by mobile phone use. You can limit your own exposure or the exposure of your children by limiting the number and length of calls or by using a hands-free kit which keeps the mobile phone away from the head and body during utilisation. Additionally, it is not recommended to position the mobile phone near the bump of pregnant women, as well as in the area of the lower stomach of children and young adults. Further detailed information about this subject is provided by the WHO on the following page: <http://www.who.int/peh-emf> WHO Fact sheet 193: June 2000.

Information about the regulations

The following homologations and warnings are applicable for certain regions as indicated. The sections

for the declaration of RoHS compliance and declaration of CE conformity can be found at the end of this guide.

Distraction

Driving

Driving requires full and permanent attention in order to reduce the risk of an accident. The mobile phone usage during driving (even when using a hands-free kit) can cause a distraction and provoke and accident. Obey the laws and local regulations concerning the mobile phone usage when driving a car.

Operating machinery

The use of machinery requires total and constant attention in order to reduce the risk of an accident to the maximum possible.

Product handling

General declaration on mobile phone usage and handling

You alone are responsible for the way you use your mobile phone and for any might arising consequences of this usage. Switch-off your phone whenever required. The use of a mobile phone is subject to security measures to protect the users and their environment.

- Always handle your phone and accessories with care and store them in clean places. Avoid storing your device in dusty or dirty areas.
- Do not expose your mobile phone and its accessories to unshielded flames or lit tobacco products.
- Do not expose your mobile phone and its accessories to liquids or a high humidity.
- Do not drop, throw or shake your mobile phone and accessories.
- Do not clean the device or its accessories with corrosive chemical products, dissolver or aerosol.
- Do not paint your mobile phone or its accessories.

- Do not try to open, disassemble, or repair the mobile phone by yourself.
- Do not expose your mobile phone or its accessories to extreme temperatures: minimum -10°C, maximum +50°C.
- Follow the local regulations concerning the recycling of electric products.
- Do not carry your mobile phone in the back pocket of your trousers. It could be damaged when sitting down.

Small children and infants

Keep the phone and its accessories out of reach for small children and infants as they might be tempted to play with it. Your device and its accessories are no toys and small children and infants or other person near them can get blessed. The device can also get damaged unintentionally.

Your mobile phone contains small parts with sharp edges which can cause injuries or which can fall apart hence represent a risk of suffocation in case of ingestion.

Demagnetisation

In order to prevent any risk of demagnetisation, avoid placing your mobile phone close to electronic devices or to magnetic data storage medium.

Electrostatic discharge (ESD)

Your mobile phone is sensitive to electrostatic discharge in some places; in particular, avoid touching the metallic contacts of your SIM-card.

Antenna

Avoid touching the antenna while the antenna is in use. During a call, contact with antennas affects the communication quality.

Optimised use position

When you are making or taking a call, hold you mobile phone close to your ear by orientating the bottom towards your mouth.

Airbags

Do not place your mobile phone in the area over an airbag or in the zone where the airbag could be deployed. Place your mobile phone in a dedicated area before starting driving a vehicle.

Seizures/Blackouts

The mobile phone can produce a strong or blinking light.

Repetitive strain injury (RSI)

In order to minimise the risk of RSIs when you are

sending messages or playing on your mobile phone:

- Do not hold the mobile phone too firmly.
- Press keys gently.
- Use dedicated functions which help reducing the usage of device keys such as preinstalled messages and the insertion of predictive text.
- Take regular breaks in order to remove tension.

Emergency calls

This device, as any other mobile phone, uses mobile networks. The network connection is not always guaranteed in all situations. Therefore, never depend solely on your mobile phone for setting off emergency calls.

High volume

This mobile phone is capable of producing sounds at a high-volume which could damage your hearing. Turn down the volume before using headphones, Bluetooth stereo headsets or other audio devices.

Generation of heat

Your device can generate heat during battery charging or during normal operation.

Electrical safety

Accessories

Only use approved accessories. Do not connect any product or accessory not compatible with the mobile device. Do not touch or short-circuit the battery lugs with a metallic object like a coin or a ring of your bunch of keys.

Connection in vehicles

Before connecting a mobile phone with the car's electric system, ask qualified personnel for help.

Defective and damaged products

Do not try to disassemble your mobile phone or its accessories. The repair of the mobile phone or its
