Re: Class II Permissive change to Sychip Grant FCC ID: QPUWLAN6060SD

Date: January 10, 2006

To whom it may concern,

The purpose of this letter is to authorize Palm Inc. to file a Class II Permissive change application to the above Sychip grant to allow the Sychip SDIO IEEE802.11 B card to be used in a co-located transmitter configuration with the Palm Inc Treo 700W phone (FCC ID: O8FJIMI)

A Class II permissive change to the Treo 700 grant was filed by Palm Inc and approved by the Commission recently. This permissive change is being filed in accordance with FCC policy of having both transmitters in a co-located configuration be approved for use in such a configuration.

If there are any questions or concerns, please contact Paul Prudhomme at 972-202-8893.

Best Regards
