

Label Exhibit

The FCC identification label will be made by B-773 a metallized polyester film with a permanent acrylic pressure sensitive adhesive and a matte topcoat specially formulated for laser printing.

A label displaying the FCC ID placed on the top of the RF shield. This label also contains the module part number, serial number and the date code.

The enclosure of the product that uses this module also must have label referring to the enclosed module. An example is shown in the following pictures.
