5. Press  (Select)

Ending a Multi-party

You can end a Multi-party connection.

While on a Multi-party

1. Press  (End)
2. All calls are disconnected

DTMF Tones

DTMF (Dual Tone Multi-Frequency) Tones can be sent during a conversation. These are often used to access voice mail, paging and computerised home banking. For example, you may need to enter a number to remotely access voice mail messages. A phone number may be stored in the Contacts together with a DTMF sequence, allowing the number to be dialled upon recall and the DTMF sequence to be sent automatically.

Text Entry

You can use alphanumeric characters to enter text.

	Text Mode					
Key	T9®	Normal (U)	Greek (V)	Extended (W)	Numeric (0 ~ 9)	
	Alternatives	+ _	+ _	+ _	0	
	Punctuation	. @ / : ; * # + - " , ! ; ? ' _ () [] { } & % \ ^ ~ < > = € £ \$ ¥ ¢ §				1
	abc	ABCabc	ABÃ	AAÄÆBCÇ aaaæabc	2	
	def	DEFdef	ÄEÆ	DEÉFdeèéf	3	
	ghi	GHIghi	ÇÈÉ	GHIghii	4	
	jkl	JKLjkl	ÊËÌ	JKLjkl	5	
	mno	MNOmno	ÏÏ	MNÑOOØ mnñooøò	6	
	pqrs	PQRSpqrs	ÐÑÓ	PQRSpqrsß	7	
	tuv	TUVtuv	ÔÖÖ	TUÜVtuüüv	8	
	wxyz	WXYZwxyz	×ØÙ	WXYZwxyz	9	
	Shift/Lock*	Shift/Lock*		Shift/Lock	*	
	Space	Space	Space	Space	#	

Note: Press once to enter a single capital letter (subsequent characters will be lower case). Pressing * twice acts as a keyboard CAPS LOCK function and subsequent characters will be uppercase. Press a third time to return to lowercase character entry.

T9® Text Input

Using this mode of text entry dramatically reduces the number of key presses required:

Press a key once for any letter you require on that key. The desired letter may not be displayed. Continue pressing other keys until the end of a word is reached; then check that the word has been typed correctly before continuing on to the next word.

If the combination of letters typed has produced a word which is not the one you require, press  repeatedly until the correct word is displayed. Continue to the next word.

If the word you require is not in the internal dictionary (i.e. it is a proper noun or a rarely used word) then it should be entered using the Normal () mode.

Other Text Modes

To access any of the other text entry modes use  to cycle through until the desired mode is displayed in the left side of the display.

When using Normal (), Greek () or Extended () text entry modes, each time a key is pressed in quick succession it will display the next character available on that key. Releasing the key, or pressing another key will enter the currently displayed character and the cursor will move to the next position.

Editing Text

Pressing  will move you up or down one text line.

Pressing  will move you left or right one character. When the cursor is moved over a character and another key pressed this will insert the new character immediately before the selected character. Pressing  will delete the character to the left of the cursor or delete the current line when pressed and held.

Exploring the Menus

My Phone

You can customize the phone with this My Phone menu which has various setting options for different events and environments.

Profiles

You can switch in 4 different ways, each with a distinct combination settings of Ring Volume, Ring Type, Message Tone, Slide Open Tone, Slide Close Tone, Keypad Tone, Warning Tone, Alerting Method.
