1. Getting started

☐ Installing a Keyboard Wedge Scanner

- ① Make sure that the scanner has the correct cable for your system.
- ② Turn off the power of the system. (or PC)
- ③ Unplug the keyboard from the system.
- ④ Connect Y cable to the system and keyboard.
- ⑤ Turn on the power of the system.
If the indicator LED lights up, Buzzor sounds, the scanner is ready for reading.

☐ Installing an RS- 232C interface scanner

- ① Make sure that there is a power supply to the scanner. (If necessary)
- ② Connect the cable to the RS-232C port of the device.
- ③ Make sure the host device should have communication program (Xcom, procomm, Hyperterminal) before transmitting data.

2. Setup Procedure

The general procedure to program is as follows.

- ① Scan the command symbol "Program"
- ② Scan one or more parameters.
- ③ Scan the command symbol "End" to close procedure.

Example 1. To set the RS 232 parameters to 9600.N,8,1 (Page 7-9)

- ① Scan the barcode "Program"
- ② Scan "9600" "N" "8" "1"
- ③ Scan "END"

Example 2. To set additional digit for UPC/EAN. (Page 27)

- ① Scan "Program"
- ② Scan "Addenda 5 digit Enable"
- ③ Scan "End"

WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
