Subject: Confidentiality Request for Airespace Deployment Guide

Gentlemen,

On behalf of Airespace, I request that the Airespace Deployment Guide be withheld from public disclosure per Section 0.459 of the FCC Rules.

This request is made under the provisions of Section 0.457(d) of the FCC rules and Sections 552(b)(4) of the Freedom of information Act. These Sections authorize withholding from public inspection, materials which would be privileged as a matter of law if retained by the person submitting them in addition to materials, which would not customarily be released to the public, by that person.

Justification:

The Airespace deployment guide represents the culmination of a significant effort by the Airespace System Engineering group to characterize deployment parameters for different building environments. It provides detailed data on necessary access point density as well as test results that outline necessary signal strengths for different 802.11 bands. Airespace feels the intellectual property resulting from these numerous site surveys would be beneficial to its competitors, thus detrimental to its business.

Additionally this manual includes instructions on upgrading an 802.11 B/G access point which should not be made available to the general public.

This deployment guide is intended for the professional installation subcontractor who would be performing an installation for an Airespace customer. These contractors would have been approved by Airespace and subject NDA.

If you have any questions, please do not hesitate to contact me at: david@waitt.us or (408) 832-7053

Sincerely,

A handwritten signature in black ink, appearing to read "David Waitt", with a stylized flourish at the end.

David Waitt
