Reverse TNC's – to allow connection of external antennas

VAP1200B Left Side

The hole shown in the photo will not be present in the production version of the radio. It will house a reverse TNC connector that will eventually allow a external 5GHz antenna once certified with the commission. At the present time the connector will not be functional until certified.

Will be used for an ext
5GHz antenna

VAP1200B Right Side

This hole will not be present in the production version of the VAP1200, This is an error in the prototype housings.
