

1. Make sure the satellite is in a good position to receive the signal. The satellite will only be able to receive the signal if it is in a good position to receive the signal. The satellite will only be able to receive the signal if it is in a good position to receive the signal.

2. Search satellites on search satellites are required for indoor flights. The search satellites on search satellites are required for indoor flights. The search satellites on search satellites are required for indoor flights.

3. Calibrating the compass. The compass is used to determine the direction of the drone. The compass is used to determine the direction of the drone. The compass is used to determine the direction of the drone.

4. Automatic Return to Home. The drone will automatically return to home if it loses signal or if the battery is low. The drone will automatically return to home if it loses signal or if the battery is low. The drone will automatically return to home if it loses signal or if the battery is low.

2.5 Operational requirements

a. During the flight, the motor is turned off in case of emergency.

b. The drone is not to be used in a crowded area.

c. The drone is not to be used in a crowded area.

3 Maintenance

a. Clean the propellers and motor.

b. Check the battery level.

c. Check the battery level.

13 Specifications

● Aircraft

Aircraft weight: 215g

Aircraft size: 140x140x50mm

Altitude: 120m

Image transmission range: 500m

Flight time: 10-15 minutes

Operating conditions: 0°C to 40°C

Video transmission frequency: 2.4GHz

Motor: Brushless motor

Battery: 3.7V 220mAh

Charging time: 1-2 hours

● Remote control

Operating frequency: 2.4GHz

Operating conditions: 0°C to 40°C

Charging time: 1-2 hours

● Package contents

1. Aircraft

2. Remote control

3. USB charging cable

4. Propellers

5. Battery

6. User manual

2.2 Check before use

a. Check the battery level.

b. Check the battery level.

c. Check the battery level.

1.1 Changing propellers

a. Remove the propeller.

b. Install the propeller.

c. Tighten the propeller.

1.2 Aircraft Battery Installation/Removal

a. Insert the battery.

b. Remove the battery.

c. Tighten the battery.

1.3 Accessories (available separately)

a. Propeller guard.

b. Landing gear.

c. Camera.

1.4 Accessories (available separately)

a. Propeller guard.

b. Landing gear.

c. Camera.

1.5 Accessories (available separately)

a. Propeller guard.

b. Landing gear.

c. Camera.

1.6 Accessories (available separately)

a. Propeller guard.

b. Landing gear.

c. Camera.

1.7 Accessories (available separately)
