Date: September 13, 2010

We, Getac Technology Corporation, declare the device of FCC ID: QYLS400G, Model Name: S400, used the module of Qualcomm Gobi2000 (FCC ID: J9CGOBI2000, report number: 80-VN379-203 Rev. A and MH80-VN379-204 Rev. B), module of Intel 622ANHMW (FCC ID: PD9622ANH, report number: INTEL-090601F—DTS, report number: INTEL-090602F—NII, R76613—DFS) and the module of CastleNet BTC04R (FCC ID: RK9-BTC04R, report number:RF970806A01.)

There had no designing changes for the three modules when installing the modules in the tablet PC. The conducted test results were referred to the original test values due to the modules kept the same thing as the original ones.

Should you have any questions or comments regarding this matter, please have my best attention.

Sincerely yours,
