Environmental treatment:

Conductive sponges attached to both sides of the zinc alloy frame are grounded to the screen.

The small board is grounded with a conductive sponge and zinc alloy frame

Here the zinc alloy paste conductive sponge is grounded to the horn

Address: Room 302, 3rd Floor, Building B, Gangshen Innovation Park, No.40 Huaning Road, Dalang Street, Longhua District, Shenzhen

The zinc alloy conductive sponge in the middle frame is grounded to the shielding cover of the mainboard.
(The conductive sponge below the motherboard is recommended to be a little longer and thicker, so as to ensure that it is fully grounded with the motherboard)

Note:

- 1, this antenna is only suitable for debugging prototype, motherboard PCB or RF circuit material changes, accessories (such as camera, screen, horn, motor, battery, shell process) and other changes, must be tested and verified by our company before use.
2. If this project needs to be verified by the third party, please send the prototype to our company for retesting at least one working day in advance, and then send it to our company for testing, so as to avoid delays in the project progress after two or multiple tests!
