Description

FLEX 12VRX

Receiver, depending on the number of boards, corresponding to 12-key transmitter.

FLEX 8VRX

Receiver, depending on the number of boards, corresponding to 8-button transmitter.

The RF circuit in each device is exactly the same and connects into the digital circuit board (the board with the buttons and control processor). The main circuitry (micro-controller) on this digital circuit board is the same for all the devices in the family, the main difference being that the board is extended as more buttons are added.
