Re: FCC ID: R7PFTAR1S1

To Whom It May Concern:

The following application is submitted on behalf of our client, Landis+Gyr Technology, Inc., for evaluation of their model Field Tool Adapter for certification under FCC Part 15.247.

The Field Tool Adapter module is a battery powered "bridge" between a PC based application and the 900 MHz End Point Meter. The module contains a 900 MHz two way transceiver, a logarithmic Detector for 1 way Rx, Bluetooth transceiver and a lithium ion battery. It is contained in a belt mounted damage resistant plastic housing. The intent of the field tool is to be a close range device for trouble shooting Electric, Gas and water modules.

The Bluetooth radio (FCC ID: ED9LMX9838, IC: 1520A-LMX9838) is a preapproved module enclosed in the Field Tool Adapter. This Bluetooth radio can transmit simultaneously with the 900 MHz transceiver; therefore, intermods were tested and were found to be compliant.

The Field Tool Adapter was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive, flowing style.
