

Transmitter Instructions

Before you can operate the device the transmitter must be learned to the receiver. This is very easy turn on your transmitter you will see the LED blink two times. Press one of the activation buttons and hold it down. Apply power to the receiver device while continuing to press the transmitter activation button and you will hear the relay click. **Be Careful the device may start operation.** If you experience problems repeat the process again. After the transmitter is learned you should not have to repeat this process again

Place the transmitter in the palm of your hand . You will see three buttons. The button to the lower left turns the transmitter on and off after use. Press this button a red LED will blink twice and go out letting the operator know the unit is activated and ready for operation. Press the button again the LED will blink once shutting the unit down. The unit will shut down automatically if you fail to turn it off or there is no activity on the activation buttons for a period of five minutes.

The activation buttons are located above the power button and have raised surfaces. The two buttons are used to activate the device after the transmitter is turned on.
