

Outdoor Wireless Temperature Transmitter and Receiver Kit

Your kit includes:

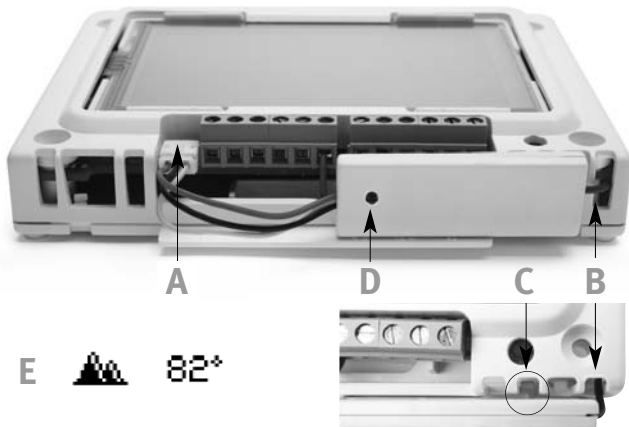

Outdoor Wireless
Temperature Transmitter
+ Antenna
+ Receiver Module
+ 2 Batteries

This convenient feature
provides you the outdoor
temperature right
on your thermostat.

Installation Instructions

1. Remove the 4 screws located at the back of the Transmitter and install the 2 AA batteries included. The LED will flash on the transmitter periodically. Screw the antenna into the top.
 2. Install the receiver by simply removing the top cover of the thermostat, plug the receiver into the white connector located to the left of the screw terminals. (A)
 3. Place the antenna wire into the 4th vent as shown (B). Clip the receiver into the 2nd vent (C).
 4. Press the “reset” button on the receiver module for 10 seconds to activate the transmitter and receiver. The outdoor temperature will appear on your thermostat within 5 minutes. (D)
 5. Position your Outdoor Transmitter in a permanent location. You must place the Outdoor Transmitter in an area that is sheltered from the elements. Suggestions include under the eaves, an upper window frame.
 6. Finally, on your thermostat, ensure that the dot to the right of the temperature (E) flashes approximately every 15 seconds.
-

Caution: If there is no temperature on the thermostat - press the “reset” button on the receiver module again for 10 seconds to activate the transmitter and receiver. Note: If a replacement transmitter is required this procedure must be followed to initialize the transmitter/receiver.
