CopyFido will use the value of the generated ID to avoid the change every time the file is opened. The

2. OEM/ODM and platform antenna vendors should try to adapt the antenna with a VSWR of 2 (S11<-10dB) for a good antenna matching, and if not possible, try to achieve a VSWR of 3 (S11<-8dB) for a medium antenna matching

3D Peak Antenna gain should be equal or greater than -2 dB. If a host indicator plans to use a lower gain antenna of the same type, additional COMPTONCERTS testing need to be performed while the module is installed in the host.

Maximum VSSWR of 2 (811–10 dB) is a good reference restriction. If not possible, try to achieve a VSSWR of 3 (811–8 dB) for a medium restriction.
