Subject: Requesting Class II permissive change for FCC ID: **RAS-MT7925B14L**

To Whom It May Concern:

The purpose of this letter is to request a Class II Permissive change for
FCC ID: **RAS-MT7925B14L**, original granted on [05-02-2024](#), [06-06-2024](#), [09-25-2025](#).

There is no other hardware or electrical modification made to the applying modular transmitter
itself except below:

Enable the modular to be integrated in **Lenovo Ireland International Limited**, Model:
TP00174B.

The module installed into host platform mentioned above is electronically and
mechanically identical to the original certified module. Software security remains
unchanged from the original application. The Original FCC testing on module under FCC
ID: RAS-MT7925B14L was performed with an antenna of higher gain, and the antenna
was connected to the module in an open environment. The current host platform under
application uses an antenna of the same type but of lower gain and is installed inside the
host platform enclosure. The physical restraints introduced by the host platform should
have resulted in equal or lower level of radiated emission. Therefore, additional Radiated
emission testing is not necessary.

Best Regards,
