

1

CHARGE

IMPORTANT: 6V Ni-Cd Battery Pack is not charged when newly purchased-charge before using.

1. Insert battery pack into the charger as shown.
2. Plug the charger into a standard 110/120V electrical outlet.
3. Charge for approximately 8 hours for the first charge. Subsequent charges require only 4 hours.
4. Unplug the charger from the outlet and remove the battery pack from the charger.

NOTE: Do not pull on wires, as they may come loose from the plug connectors.

2

FCC NOTES

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
 - Increase the separation between the equipment and receiver
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
 - Consult the dealer or a qualified electrician for help
- This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
1. This device may not cause harmful interference.
 2. This device must accept any interference received, including interference that may cause undesired operation of the device.
- CAUTION:** Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

3

SAFETY

- Do not operate during thunderstorms.
- Avoid water, sand, and snow when operating your vehicle. In addition, do not submerge your vehicle or controller in water.
- Never operate your vehicle on the street or highway.
- Do not run your vehicle in a confined or crowded area, and do not use people or animals as obstacles.
- Keep fingers, hair, and loose clothing away from the tires, gears, and motor while the vehicle is switched ON.
- Do not leave vehicle or controller near sources of heat or under direct sunlight for long periods of time.
- Do not leave vehicle or controller outside overnight-dampness is harmful to interior components.
- Remove all batteries when not in use to avoid accidental operation.

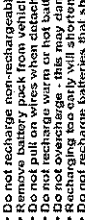

Adult supervision is recommended when operating this vehicle.

4

BATTERY PRECAUTIONS

- THIS PRODUCT USES A NICKEL-CADMIUM RECHARGEABLE BATTERY PACK. BATTERY MUST BE RECYCLED OR DISPOSED OF PROPERLY.
- Batteries should be inserted with the correct polarity.
 - Do not short circuit battery contacts.
 - Do not mix old and new batteries.
 - Do not use batteries that have been damaged, deformed, or overheated (swollen, bent, or leaking).
 - Remove batteries if vehicle will not be used for a long period.
 - Check the batteries regularly for leakage.
 - Exhausted batteries should be removed from the charger.
 - Do not dispose batteries in a fire. Batteries may leak or explode.
 - Use only the recommended batteries or batteries of equal quality/type.

5

ALKALINE BATTERY PACK OPTION

- Do not recharge non-rechargeable batteries.
- Remove battery pack from vehicle before recharging.
- Do not pull on wires when detaching the battery pack plug/connector.
- Do not recharge warm or hot battery packs- wait until pack has cooled.
- Do not use the battery pack in a fire.
- Recharging too early will shorten battery pack life.
- Do not recharge batteries that show wear or leakage.
- Do not recharge in high temperatures or bring the battery pack near a flame.
- Do not use the battery pack in a fire or damp.
- Do not take the charger or battery pack apart.
- Rechargeable batteries should always be charged under adult supervision.

BATTERY PERFORMANCE NOTE:

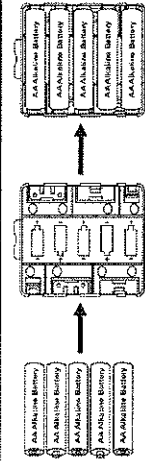

For best performance use alkaline batteries. If your vehicle is supplied with standard (carbon-zinc) batteries for initial use and/or demonstration purposes, we recommend replacing them with alkaline batteries when necessary. Battery life may vary depending on battery brand.

6

SET-UP

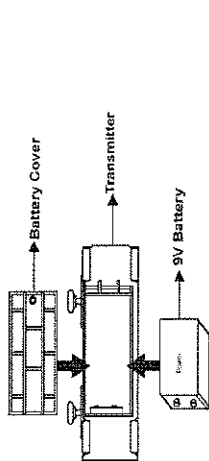

1. You can use alkaline batteries as the power source for the car instead of the 6V Ni-Cd Rechargeable Battery Pack. Insert five AA alkaline batteries into the battery magazine included in the package. The Alkaline Battery Magazine will work the same way as the rechargeable battery pack. **DO NOT PLACE THE MAGAZINE IN THE Ni-Cd BATTERY CHARGER. ON FIRE MAY OCCUR.**

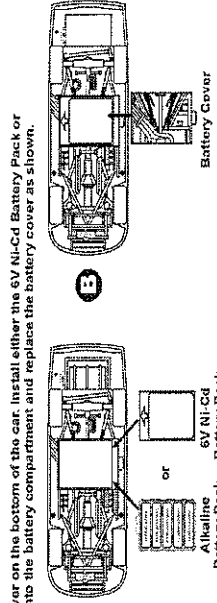

6

SET-UP

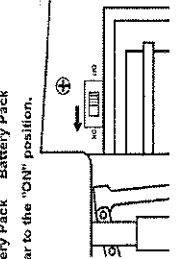

1. Place the battery cover on the bottom of the battery compartment. Insert the battery to the wire plug. Insert battery into compartment and replace the battery cover as shown.

2. Remove the battery cover on the bottom of the car. Install either the 6V Ni-Cd Battery Pack or Alkaline Battery Pack into the battery compartment and replace the battery cover as shown.

3. Move the power switch on the car to the "ON" position.

-
- Left and right turn operation
- Forward and Backward operation
