

FCC ID:

Description of Operation

ZWX-G361 is a PCI Wireless LAN Card with 11 channels. The standards of IEEE 802.11g and IEEE 802.11b. This device provided automatic fallback of transmitting speed 1, 2, 5.5, 6, 9, 11, 12, 18, 24, 36, 48 and 54Mbps. The device of RF carrier is OFDM, CCK, QPSK and BPSK. The device adapts direct sequence spread spectrum modulation. The antenna is 2dBi gain Dipole with detachable reverse SMA connector.

This ZWX-G361 is an IEEE 802.11g Wireless LAN adapter. It allows your computer to connect to a wireless network and to share resources, such as files or printers without being bound to the network wires. Operation in 2.4GHz Direct Sequence Spread Spectrum (DSSS) radio transmission, the ZWX-G361 transfers data at speeds up to 64/128-bit Wired Equivalent Protection(WEP) algorithm is used. In addition, its standard compliance ensures that it can communicate with any 802.11g and 802.11b network.
