This image shows a close-up of a printed circuit board (PCB) with various electronic components. A ruler is placed vertically on the right side of the board for scale, showing markings from 60 to 90 millimeters. The PCB is populated with several components, including:

- TP20**: A test point located near the top center.
- TP39**: A test point located near the top right.
- TP222**: A test point located near the top left.
- D76**: A diode component located near the top center.
- TP38**: A test point located near the top center.
- C54**: A capacitor component located near the top center.
- U2**: A microcontroller or integrated circuit located near the center.
- TP10**: A test point located near the center.
- Q3**: A transistor component located near the center.
- R9**: A resistor component located near the center.
- C62**: A capacitor component located near the center.
- TP8**: A test point located near the center.
- C64**: A capacitor component located near the center.
- TP21**: A test point located near the center.
- TP9**: A test point located near the center.
- U8**: A component located near the center.
- D5**: A diode component located near the center.
- TP4**: A test point located near the bottom left.
- TP37**: A test point located near the bottom center.
- TP43**: A test point located near the bottom right.

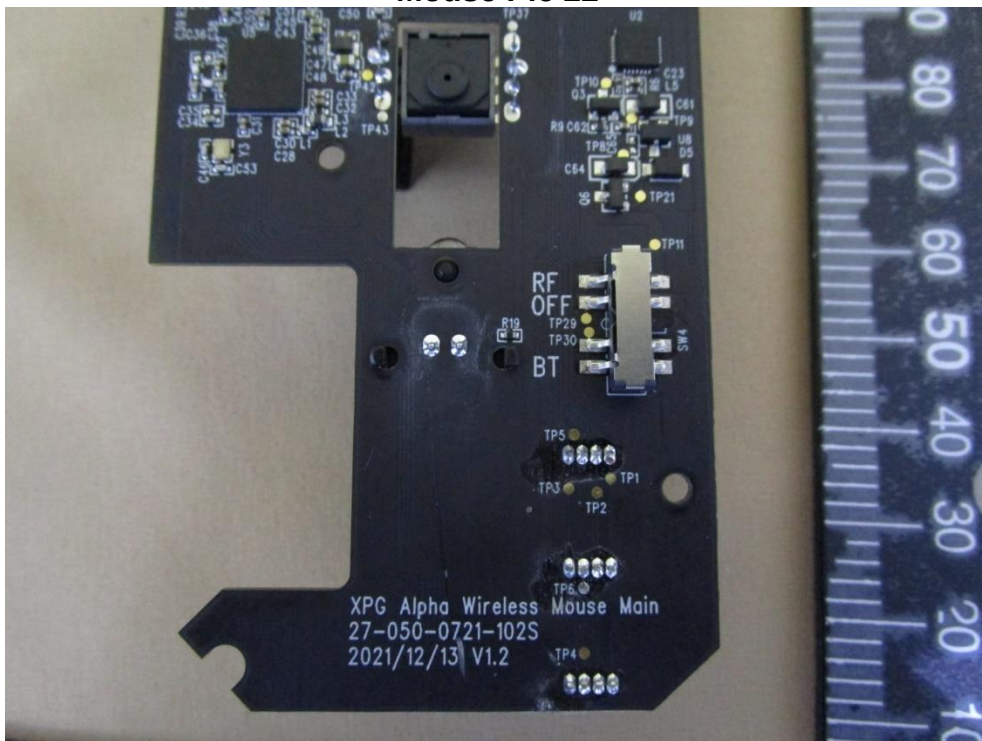

The components are labeled with their respective designations (e.g., TP20, D76, U2, C54, TP10, Q3, R9, C62, TP8, C64, TP21, TP9, U8, D5, TP4, TP37, TP43). The ruler on the right indicates the scale in millimeters.
