

No need driver

The Steps of Install Battery

1. Please prepare for two PCS new AAA alkaline batteries
2. Press the button of the mouse upper cover and pull the battery cover rearward (Please see the reference picture)
3. Please insert the batteries correctly according to the polarity marks of the battery grooves.
4. Pull the battery covers forward, when you hear “crack” sound, which shows the battery cover is locked successfully.

Attention Please

1. Please don't make the mouse far away from the receiver in order to work more smoothly.
2. You'd better use the mouse on the white desk, in this way the batteries can be used in a longer time. Please remove the batteries if the mouse will not be used for a long time.
3. This mouse with saving power sleeping functions, please press any key or scroll the wheel to wake up the mouse when it is sleeping.

4. If you want to take off the mouse power, please continue to press the ID switch of the mouse bottom over 3 seconds. If you want to take on the power, please click the ID switch once again.
5. The optical mouse will not work freely on a smooth desk, glass, and any reflecting surface, 3D mouse pad.

Caution

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more

of the following measures:

- * Reorient or relocate the receiving antenna.
- * Increase the separation between the equipment and receiver.
- * Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- * Consult the dealer or an experienced radio/TV technician for help.
