Regarding ROR00000007 Part 96 application:

a) These CBSDs are professionally installed.
b) In the 3550-3650 MHz band, Category B CBSDs must be authorized consistent with information received from an ESC, as described in §96.15
c) These category B CBSDs are limited to outdoor operations.
d) When registering with an SAS, Category B CBSDs must transmit all information required under §96.39 plus the following additional information: antenna gain, beamwidth, azimuth, downtilt angle, and antenna height above ground level. This is demonstrated in the SAS test report provided with this application

Sincerely,

Jim Dickerman

Vice President of Engineering
