Authorization to Reference Existing FCC Test Data for Certification Filing

New FCC ID: ROR2003

Product Description: 5G Enterprise Small cell with Wi-Fi

Model Number(s): PWRF-400, PCRF-400, PC-400, PCW-400

This letter serves as a formal request and authorization to reference existing FCC compliance test data for the purpose of certification of the above-referenced product under a new FCC ID.

The radio hardware design, RF circuitry, and operating characteristics of the subject device are identical to those previously evaluated and reported under the following FCC ID:

Referenced FCC ID: ROR2002

Original Test Laboratory: SGS - Compliance Certification Services (Kunshan) Inc.

Original Radio Test Report Number: KSCR240700144901

Date(s) of Issue: 20-Nov-24

Original SAS Test Report Numbers: KSCR240700144905 and KSCR240700144906

Date(s) of Issue: 21-Feb-25

The referenced test data were generated in accordance with the applicable FCC rules and measurement procedures and remain technically valid for the subject device. No changes affecting RF compliance apart from antenna configuration have been made to the radio hardware or firmware that would invalidate the referenced results, except where explicitly documented in the current filing.

Any additional testing required to address differences in configuration, host integration, antenna characteristics, or regulatory scope has been performed and is included in the current application.

This data referencing request is made in accordance with FCC policies permitting the use of previously approved test data for certification of identical hardware under a different FCC ID.

The applicant confirms that permission to reference the above-listed test data has been obtained, and that copies of the original FCC test reports are provided as part of this filing for FCC review.

If you have any questions regarding this request, please contact the undersigned.

Sincerely,
