PURPOSE OF CHANGE LETTER
For Model 75070 (Modified)

This letter is to provide additional information regarding the Application of Permissive Change for our model 75070 (Modified) based on the previously certified model 75071 .

The RF module of the above-mentioned models is identical in electrical circuitry as well as the antenna.

The main difference is the additional two small PCBs to improve the lock-up and burst noise issue respectively. In addition, some components have been changed for volume and off-current improvements. The enclosure and base band PCB layout are also different.

All design including electronic and electrical remain the same except the above-mentioned change.

The above-mentioned change is not intended for maximum power and change on field strength ratings.

Should you have any query, please don't hesitate to contact the undersigned.

Your Faithfully,

Ronilo Paredes
Senior Approval Engineer
