The EUT is a RF amplifier. The manufacturer does not provide an antenna for sale with the product, hence EIRP is not measured nor calculated. The end user of this product is to exercise proper engineering judgement to select the appropriate antenna of comply with the EIRP limitations.

Sn-preAGC: Single Test Signal. Denotes Left part of the lower band/block edge frequency using a signal tuned at Low Channel of the operational band.

Cm-preAGC: Composite Test Signal. Denotes Left part of the lower band/block edge frequency using one signal tuned at Low Channel of the operational band and a second signal tuned at the Low Channel plus 0.4MHz or 5MHz for narrowband/broadband signal respectively.
