Subject: Modifications to the EUT

Gentlemen:

To successfully meet the radiated emission requirement of FCC Part 15.231 (e), it was necessary to do the following:

1. Reduce the number of coils of the antenna from seven to three.
2. Change R7 from 100 ohms to 180 ohms

The exact modifications will be implemented and will be contained in production devices that are released and sold. If you have any questions, please do not hesitate to contact us at (503) 626-2797 ext 16.

Sincerely,

A handwritten signature in black ink that reads "Hal Alles". The signature is written in a cursive style with a long, sweeping underline.
