Product Application	Product Category	Product Type
Military ☐ Commercial ☒	Telecom ☒ Avionics ☒ Info Tech. ☐ Other ☐ Space ☐	Production Unit ☐ Pre-production Unit ☒ Prototype ☐
Product Name	TTagB Transceiver Tag and TTB-434 Active Reader	
Part Number		
Model Number	TTB-434-01 (for TTagB Transceiver Tag) and TTB-434 (for TTB-434 Active Reader)	
Serial Number	S/N for reader SR43000, S/N for tag ST43000	
Power Requirements: AC/DC, Current	TTagB Transceiver Tag : Two Lithium coin cells (e.g. CR- 2032) TTB-434 Active Reader: 6 to 48V DC supplied as POE (Power Over Ethernet)	
Operational Frequency	TTagB Transceiver Tag: transmit freq. 433.92 MHz, receive freq. 434.02 MHz TTB-434 Active Reader: transmit freq. 434.02 MHz, receive freq. 433.92 MHz	
Typical Installation Instructions or Configuration	TTagB Transceiver Tag is a self-contained equipment, no installation required. TTB-434 Active Reader is connected with Ethernet cable to Power Over Ethernet injector, to the port carrying data and DC power. The DC power port of the injector is connected to a AC to DC wall adapter. The data port of the injector is connected with the Ethernet cable to LAN (PC, HUB, switch or router).	
Ground EUT	No	
# Interconnecting Leads	None for TTagB Transceiver Tag. Ethernet cable for TTB-434 Active Reader	
Internal Clock Frequency	TTagB Transceiver Tag : 32.768 kHz TTB-434 Active Reader: 8 MHz and 20 MHz	
Peripheral Equipment	None for TTagB Transceiver Tag. PC, POE injector and AC to DC wall adapter for TTB-434 Active Reader.	
Cables	None for TTagB Transceiver Tag. Ethernet cable for TTB-434 Active Reader.	
Functional or Self-Test Duration		
Brief Functional Description	Transceiver tag operating in 434 MHz band, 433.92 MHz transmit and 434.02 MHz receive mode. The TtagB transmits only when interrogated by a reader device. This tag has a motion detector and brown out detection. TTB-434 Active Reader, equipped with a built-in Ethernet controller, connects directly to a LAN (10Base-T) and communicates with the server using TCP/IP protocol. It is receiving RF data in 433.92 MHz band, recognizing data from the tags and transmitting collected data to the server. TTB-434 Active Reader periodically sends an inquiry signal to the tags prompting them to answer.	

Other Remarks
