To: Mr. Tim Johnson, American TCB
From: David Waitt
Subject: FCC ID RVW2230 compliance with FCC "integral" antenna regulation (15.407(d))
Date: 25 Mar 2004

This letter attests to the compliance of model 2230 access point to the above referenced FCC specification. If there are any questions or if additional information is required, please contact me at david@waitt.us

On behalf of Alcatel,

A handwritten signature in dark ink, appearing to read "David Waitt", written over a light blue horizontal line.

David Waitt

Permanently attached 5 GHz "external" antennas.

In certain installations where an external 5GHz antenna will be used, it may be necessary to make the antenna connection permanent (thus making the antenna "integral") at the time of installation.

In these instances the antenna connection will be made permanent by Nortel Networks personnel at the installation site.

If an external antenna is required for an installation that is not being performed by Nortel Networks personnel, the connection will be made permanent at the time of manufacture and be shipped from the factory with the connection already made.
