

DRAGONFLY

Transmitter with 4 Channels

Manual Instruction

Thank you for purchasing Dragonfly Transmitter with 4 channels. The system is designed to operate conveniently, look beautiful and fly neatly. It can be used with helicopter and aeroplanes. This product is suitable for beginners and the advanced.

Warning

- Make sure you are using a different band to others in the same area.
- Do not operate the system on night or during thunderstorm.
- Do not operate this system near people, buildings, railway, road and overhead wires.
- Make sure the antenna is fully extended.
- Check if you need to re-charge the battery before flying.

Caution

- Be sure not to hit, press the product heavily.
- Turn off the transmitter after flying. Remove all batteries if the transmitter is not in use for a long period.
- Keep the transmitter from children.
- Keep this instruction manual in a handy, safe place. You'd better lend the transmitter with this instruction manual together to others.
