DECLARATION OF CONFORMITY Declaration of Conformity

WELCOME

Thank you for choosing a cellular phone from Maxon Telecom, Korea's second-largest IT company and a manufacturer with more than two decades of experience in the electronic communication industry.

Your new communication device represents the cutting edge technology of the 21st century, featuring 64k brilliant color display, enhanced messaging service (EMS), polyphonic ring tones and stunning games along with extensive Organizer and Phonebook properties.

Uplink to the Mobile Internet facilitated with WAP 2.0 and GPRS data connection.

The phone size has always been a Maxon focus point, and the MX-V30 have very modest exterior dimensions and will fit into any shirt pocket or purse.

40 different ring signals, SMS alert signals, and wallpapers along with renamed profiles and caller groups facilitates a high degree of personalization.

You have acquired a phone and a communications companion that will enable you to stay tuned wherever you go.

ABOUT THIS USER GUIDE

This user guide is written only for the MX-V30 cellular handsets. The contents of the user guide follow the same order as the phone menu system goes. Please note that some optional functions may not be shared by all models.

Inquiries regarding the user guide or phone handling can be addressed to:

– To browse the Messages, Phonebook menu, WAP, and Look up menu.

OK Key - To select an option.

Keypad Keys - To enter letters and numbers.

*Key
- To place an international call.(+)
- To set a manner mode. (press and hold)

Key – Special character key.

USE OF SIM CARD

SIM card is always needed to use the phone. **"Please insert SIM card"** appears when the SIM card is not installed since it contains information about phone and network. Messages and phone numbers stored in the phone can be transferred to other GSM terminal if both SIM cards are the same size.

Please take note that you don't lose SIM card and that you don't keep it near magnetic and electronic devices to prevent loss of information and hitch in networking.

When you take SIM card and battery apart, you should always turn off the phone. The insertion of SIM card while charger is in use can be a contributing factor to the damage of SIM card.

NAVIGATION KEY

The navigation key is used to search through the menu.

UP

To scroll up and access the look up directly from the idle mode.

DOWN

To scroll down and access the messages menu directly from idle mode.

LEFT

To access the phonebook directly from idle mode.

RIGHT

To access the WAP menu directly from idle mode.

USING THE BATTERY

INSTALLING THE BATTERY

- ① Insert the bottom of battery into the groove at the bottom of the handset. Then ② push down the battery until it locks into place.

REMOVING THE BATTERY

- Pull down the tab ① with one hand and lift the top of the battery ② to separate from handset.

The battery must be securely placed in the battery compartment. If battery is improperly inserted, the handset will not turn on or the battery may slip off during use.

CHARGING THE BATTERY

POWER CONNECTION

- Insert the contactor of charger into slot and plug the charger into the outlet.
* Please note that the contactor should be placed into slot, a certain side up.

CHARGING STATUS

- When its battery is charged in power off mode, the phone shows an animation in LCD.

Be sure to charge the battery for at least four hours prior to the first time use. For extended battery life time, charge the battery fully for a long time rather than frequently for a short time period.

CHARGING THE BATTERY

REMOVING THE CHARGER

Press down the release latch and pull out the contactor of charger.

Don't remove the charger by pulling its cable.

IMPORTANT BATTERY INFORMATION

- Don't keep a battery near a fire and attempt to disassemble it.
Use only the battery approved by manufacturer.
- Never touch battery contactors with any metallic object, which lead to battery short circuiting especially when carrying a battery in a pocket.
 - Possible to cause burns due to blasting and hot temperature.
- Don't drop a battery and apply any physical shock to the battery.
 - Malfunction and fire are feasible.
- Please keep a battery out of children's reach and in a dry and cool area.
- Charge a battery and keep it in a room temperature.
 - Extreme temperature prevents full charging and affects battery capacity in a negative way.
- Since a battery is an expendable product, the battery operating time decreases through frequently repeated charge and discharge.
 - A new battery to be purchased when the operating time is reduced halfway.
- Keep the contactors of battery clean and dry.
- Plug out a charger in order to protect the phone when a lightning strikes.

CHAPTER 2

Basic operation

- Package contents
- Turning The Phone On and Off
(With SIM Card Installed.)
 - Installing SIM Card
 - Basic Functions
- Entering Letters and Numbers
