2. CONNECT

1. Connect and charge your device. Ensure device is fully charged before first dive.

2. Download and install DM4 software.

www.movescount.com/dm4

3. After updating and personalizing your device, disconnect it when fully charged.

NOTE:

If a device software update is available, it is downloaded and installed automatically.

3. SET DIVE SETTINGS

1. Keep middle button pressed to access **Menu**.

2s

2. Scroll with upper button and select **Dive settings** with middle button.

3. When settings are ready, keep middle button pressed to go back and exit.

2s

4. SET DIVE GAS(ES)

1. In **Menu**, select **Gases**.

2. Select the gas according to your dive plan. Select **New gas** if your mix is not in the list.

NOTE:

To use advanced features such as multigas or helium, activate enablers through general settings. See User Guide for more details.

5. PAIR TANK POD

1. Install Tank POD and open tank valve.

2. Hold your device close to the Tank POD.

3. Wait for green LED on Tank POD to flash.
