Epoch M1C Quick Start Guide

1 ANTENNA CONNECTION

Connect the donor/server antenna cables to the M1C's antenna ports on top as shown in figure 1.

Adjust antenna positioning to assure maximum RSSI and coverage.

2 SOFTWARE INSTALL

Place the installation CD into your CD-ROM. The setup will start automatically.

Follow the InstallShield Wizard to completely install the M1C software.

When prompted, connect the USB cable and install the driver. (Step 3)

3 USB DRIVER INSTALLATION

Connect the USB cable to your computer and the M1C.

When the Found New Hardware wizard comes up, click next to automatically search the CD-ROM for drivers.

*The installation CD must be in the CD-ROM.

4 SOFTWARE/POWER

Now run the M1C software, and plug in the power converter. (AC/DC Adapter)

Then turn on the M1C.

5 SOFTWARE COMMUNICATION

After opening the software verify that it is communicating with the M1C by checking that the status window has loaded properly as shown in figure 5.

6 BAND SELECTION

Go to INSTALL menu on the top of the GUI.

Click on the band you want selected.

7 MODEM SETUP

*If the M1C does not have a modem inside, proceed to step 8.

Verify that the **AUTO CONNECTION** box is checked. Enter the Site ID and Manager IP information provided by the carrier.

Click the SET button, then the "INSTALL" button.

When installation is complete go to STATUS menu and verify input/output power, gains, etc.

8 POST SURVEY

Congratulations! The M1C has been successfully installed and is ready for use.

It is recommended to do a walk-through inside of the building and make live phone calls to verify RF coverage.

Documentation and Software can be found on the CD-ROM included in the M1C box.
