

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup*	 A photograph showing a conducted emission test setup. A silver electronic device is placed on a light-colored wooden table. To the left, a power supply unit is visible on a shelf. A power strip with several outlets is mounted on the wall behind the table. A black cable connects the power supply to the device. The background is a plain grey wall.
Radiation Emission Test Setup (Below 30MHz)	 A photograph showing a radiation emission test setup. A white, rectangular test chamber is positioned on a metal stand. The chamber is surrounded by a black frame. The background consists of a wall covered in white, square-shaped acoustic absorbers. The floor is a dark, polished surface.

Radiation Emission Test Setup (30MHz to 1GHz)	 A photograph of a radiation emission test chamber. The walls are covered with white, square-shaped anechoic tiles. A bright light source is visible in the upper left corner. A metal rod or probe extends diagonally across the frame. A white table is positioned in the lower right corner.
Radiation Emission Test Setup (1GHz to 18GHz)	 A photograph of a radiation emission test chamber. The walls are covered with white, square-shaped anechoic tiles. A white table is positioned in the center. A red object is visible on the left side. A black, pointed object is visible in the foreground. A white box is placed on the table.

**Radiation Emission Test
Setup (Above 18GHz)**

*** Means' only test and setup for PART 15C .**
