

Introduction

This Wireless headset is based on Bluetooth technology, connects to a compatible phone without wires. It is easily converting your mobile phone communication to the headset. This headset integrated CSR BC02 technology, providing fast and reliable voice transmission.

Note:

This Bluetooth headset just supports "call receiving" function. If Bluetooth phone only has headset profile without handsfree profile, it doesn't support a Bluetooth phone without headset and handsfree profile, such as Nokia 7650.

The following page of this user manual focus on how to use this product.

Overview

Getting started

Charging the battery

The headset has a rechargeable Lithium Polymer battery. You have following way to charge the battery:

Charging by the AC charger

- Connect the charger cable to the charger connector on headset.
- Connect the charger to an AC wall outlet. The red LED is on, during charge mode. It takes around 2 hours to fully charge the battery. The red LED is off when the battery is full.

With battery fully charged the talk time will be 3.5 hours and the stand-by time will be about 100 hours.

Battery Low

When the battery is low, the RED flashes, the headset will produce a warning sound.

Switch ON/OFF

- Switch ON:**
In off mode, press and hold the main button for around 3 seconds to switch on. The headset produces 2 beeps. (low-hi). The green LED flashes 5 times.
- Standby mode:**
Headset switches to standby mode from link mode automatically, to save the power. The green LED flashes once in each 3 seconds.
- Switch OFF:**
In standby mode, press and hold the main button for around 3 seconds. The green LED is off.

Important Information

Trouble Shooting

1. No indication of charging is shown.

If Headset battery that is empty or has not been used for a long time it may take a couple minutes for the Headset indicator to show charging status with a steady red light.

2. If you cannot connect the headset to your phone:

- Make sure that the headset is switched on and paired with your phone.
- Make sure that the Bluetooth feature is activated on your phone.
- Check that the headset is within a maximum of 10 meters of your phone and that there are no obstructions, such as walls, or other electronic devices between the headset and the phone.
- The pairing information list of the headset may be full. The headset can store the information of up to 8 phones at a time. If the list becomes full, reset the headset to the original settings.
- If the headset does not respond to your actions, remove the battery for a short while.

Product care and maintenance

- Keep the headset dry. Precipitation, humidity and all types of liquids or vapors can damage the headset. The headset should be stored in a dry place.
- Do not use or store the headset in dusty, dry areas. If moving parts can be damaged.
- Do not store the headset in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.
- Do not store the headset in cold areas. When it warms up, moisture can form inside, which may damage electronic circuit boards.
- Do not attempt to open the headset. Non-expert handling may damage it.
- Do not drop, knock, or shake the headset. Rough handling can break internal circuit boards.
- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the headset.
- Do not touch the headset. Paint can clog the moving parts and prevent proper operation.

Children

Keep all accessories out of the reach of children.

Battery Information

- New batteries**
For first time use plug the adapter into the Headset and charge it at least 4 hours until the red indicator turns off.

Battery care

- Only qualified Service Centers are authorized to remove or replace the battery.
- The rechargeable battery has a long service life treated with good care. Temperature extremes can affect the ability of your battery to charge.
- Use the battery only for its intended purpose.
- Never use any charger or battery is damaged.
- Leaving the headset in hot or cold places, such as in a closed car in summer or winter conditions, will reduce the capacity and lifetime of battery. Always try to keep the battery between 0°C and 45°C. A headset with a hot or cold battery may temporarily not work, even when the battery is fully charged.
- Do not dispose of a battery in a fire. Dispose of batteries according to local regulations. Do not dispose as household waste.

About Pairing

What is Pairing?

Pairing is a process of associating Bluetooth devices with each. It will establish a permanent security link between the devices and enable quick access to services provided without the need to enter passkeys.

Bluetooth Passkey

Each headset has a default passkey 0000 for pairing, which is stored in its internal memory. You are usually required to enter the passkey 0000 in a pairing process with a Bluetooth mobile phone or other devices, however it depends on the kind of Bluetooth device that the headset is connected to. Please refer to the user's manual of the devices for the specific operation.

Pairing

You pair the headset with the phone by adding it to the pairing list in the phone. The two devices then recognize each other when they connect.

- When the headset is off, press and hold the main button for 5 seconds until the green/red LED fast flashes.
- Prepare your phone for pairing on Bluetooth function, searching new device, according to the phone user guide. Make sure the product is within 5m of the phone.
- * S/H12 * appears in the pairing list on your phone. Select it. Key-in the password 0000
- The headset goes into link mode after pairing. The green LED flashes 4 times in each 3 seconds.

When pairing is successful, the red indicator will turn off and the green indicator will flash.
If no pairing is possible for a period of time (approx. two minutes), the headset will automatically power off and so the previous pairing (if any) is revoked. You may need to repeat steps 1 to 4 until pairing success.

Note:

You only pair the headset with your mobile phone at the first time. You don't have to redo the pairing process until you want to use it with another mobile phone.

Calls

Answer a coming call

- When you receive a call, headset rings, and the green LED fast flashes 4 times in each 3 seconds.
- Press the main button to answer the call.

Terminate a call

Press the main button during the talking mode to terminate the call.

Making a call

When the headset is connected to your phone, make a call by using your phone in the normal way.

Making a voice dialling

If your phone supports voice dialling, and it is activated, you can use this feature with this headset.

- Refer to the phone user guide to enable the voice commands on your phone.
- On standby mode, press the main button. Wait for the tone that indicates you can say the name as you recorded on your phone.

Adjusting the Volume

- To increase the volume, press the volume up button in talking mode.
- To decrease the volume, press the volume down button in talking mode.

Reject a coming call

- When you receive a call, headset rings, and the green LED fast flashes 3 times in each 3 seconds.
- Long press the main button to reject the call.

Connect with a PC or PDA

You are allowed to connect the Headset with a Bluetooth enabled PC or PDA that is with Audio Gateway Profiles supported. Please refer to the user manual of your Bluetooth enabled PC or PDA for a step up information.

Introduction

La technologie Bluetooth sur laquelle se base le casque d'écoute sans fil permet d'établir une connexion aux téléphones sans fil compatibles. Le système transmettra facilement la communication de votre téléphone mobile au casque d'écoute. La technologie CSR BC02 intégrée dans ce casque d'écoute permet une transmission vocale rapide et fiable.

Remarque:

ce casque d'écoute Bluetooth ne prend en charge que la fonction de réception d'appels, si le téléphone Bluetooth ne dispose que du profil de casque d'écoute sans câble dans ses menus. Vous ne pouvez pas charger le casque d'écoute sans câble sans le casque d'écoute sans fil.

La page suivante du présent manuel d'utilisateur décrit l'utilisation du produit.
