Subject: FCC Approval for Exxon SpeedPass

Roland,

Motorola authorizes Intertek to use the c18 documentation supplied by Motorola for testing and certification of Exxon SpeedPass for FCC approval.

The documents supplied for use includes schematic, block diagram and operational description, which were used as Motorola exhibits for the c18 FCC submission. These documents are being supplied under NDA between Motorola and Intertek and should not be shared with Exxon, TSL or SAT.

The following exhibits may be used for the filing with the FCC, but you must protect the confidentiality of the info in your filing process. Intertek must request confidentiality with FCC when submitting the three exhibits below.

Exhibit 4 Block diagram

Exhibit 5 Schematics

Exhibit 12 Operational Description.

Intertek representing Exxon SpeedPass in submitting for approval of the host device containing c18 with the FCC is authorized to use the company name "Motorola", product name "c18" and software version number "03.06 or newer" solely for the certification process of Exxon SpeedPass host device which has the Motorola c18 data module embedded.

Regards,

Steve
