

# Product Specification

**IEEE802.11 b/g/n 2.4G 1T1R WIFI+BT V2.1+EDR/BT3.0/BT 3.0+HS/4.0 USB**

**MODULE Version: 1.0**

**BL-R8723RB1**

## FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

## The 150Mbps Wireless N SDIO

Module is designed to comply with the FCC statement. FCC ID is S8J-R8723RB1. The host system using 150Mbps Wireless N SDIO Module, should have label indicated it contain modular's FCC ID: S8J-R8723RB1.

This radio module must not installed to colocate and operating simultaneously with other radios in host system , additional testing and equipment authorization may be required to operating simultaneously with other radio.

## RF warning for Mobile device:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

## 1. General Description

BL-8723RB1 product Accord with FCC CE and is a small size and low profile of WiFi+BT combo module with LGA (Land-Grid Array) footprint, board size is 19.5mm\*12.4 mm with module height 0.6mm. It is 150 wireless USB adapter which has lower power consumption, high linearity output power, accords with IEEE802.11B/G/N, and supports IEEE802.11i safety protocol, along with IEEE 802.11e standard service quality. It connects with other wireless device which accorded with these standards together, supports the new data encryption on 64/128 bit WEP and safety mechanism on WPA-PSK/WPA2-PSK, WPA/WPA2. Its wireless transmitting rate rises 150M, equivalent to 10 times of common 11b product. The inner AI high gain ceramics antenna adapts different kinds of work environment. It's easy and convenient to link to wireless network for the users using desktop, laptop and other device that needs connect to wireless network.

The WiFi throughput can go up to 150Mbps in theory by using 1x1 802.11n b/g/n MIMO technology and Bluetooth can support BT2.1+EDR/BT3.0 and BT4.0.

## 2. The range of applying

MID, networking camera, STB GPS, E-book, Hard disk player, Network Radios, PSP, etc, the device which need be supported by wireless networking.

## 3. Features

| Feature                     | Implementation                                                                                                                                                                                                                                                                                                                                                                                                                   |

| The connect type of Antenna          | Connect to the external antenna through the half hole. The antenna and other interface get connected to the external devices by the edge half a circle welding plate.                                       |

## 6. The block diagram of product principle

## 7. The supported platform

| Operating System      | CPU Framework | Driver |
|-----------------------|---------------|--------|
| WIN2000/XP/VISTA/WIN7 | X86 Platform  | Enable |
| LINUX2.4/2.6          | ARM, MIPSII   | Enable |
| WINCE5.0/6.0          | ARM ,MIPSII   | Enable |

## 8. The definition of product Pin

Top and bottom view of BL-8723RB1

| Pin No: | TYPE | Description |
|---------|------|-------------|
| 1       | P    | DC:3.3V     |
| 2       | I/O  | UDM-        |
| 3       | I/O  | UDP+        |
| 4       | P    | GND         |
| 5       | P    | GND         |
| 6       | O    | ANT         |
| 7       | P    | BT_PCM_SYNC |
| 8       | P    | BT_PCM_CLK  |
| 9       | P    | BT_PCM_IN   |
| 10      | P    | BT_PCM_OUT  |

## 9. The Structure and Size of product

## 10: The ANT Pin connect to antenna, please refer to design demand

- The current of 3.3V power supply must be >300mA, its ripple wave must be <30mV. The GND pins of module and external antenna need to be an incorporated part. The ground plane should be larger, module and antenna should keep far away from interference source.
- The sixth pin is 2.4G high frequency output, coplanar impedance of layout line between this pin to antenna interface should be  $50\Omega$ , we suggest use arc line or straight line, and beside the line there will be ground plane that its length as shout as possible, the longest length is no more than 50mm.
- L1, C1, C2 constitute a  $\pi$ -type network that we preset, please make it close to antenna interface, this  $\pi$ -type network is used to match the antenna parameters and control the radiation. It should be adjusted according to the real condition when being used. Normally you can only mount L1 that its parameters are: 10pF, NPO material. No need C1 and C2

## USB interface Circuit reference pictures

USB\_A-PLUG

Two root go line do difference, but also required to make 90  $\Omega$  the impedance test

## 11. Typical Solder Reflow Profile
