Subject; **Modular Transmitter Application**

**Company name: Trimble Inc.**

**FCC ID: S9E-73355046**

Dear Sir/Madam,

This letter includes the FCC application requirements for Modular Transmitter Approval Request for;-

FCC KDB 996369 D01 'Module Certification Guide v02; and  
FCC KDB 996369 D03 OEM Manual v01

In accordance with 47CFR 15.212 Modular Transmitters and KDB 996369 D01 'Module Equip Auth Guide v02'. FCC ID:**S9E-73355046** has been examined against the following requirements.

| <b>Requirement per 15.212 and KDB 996369 D01</b>                                                                                                                                                                     | <b>Explanation from Grantee</b><br>(do not write yes/no, but explain why product complies/how it is achieved) |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------|
| The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly.                          | Yes, The modular with a shield; the physical components and tuning capacitor(s) on the module assembly.       |
| The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal.                                                                  | Yes, STM32H743VI 11 It has the functional requirements                                                        |
| The module must contain power supply regulation on the module.                                                                                                                                                       | The modular has a onboard 5V regulator (integrated in STM32H743VI).                                           |
| The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per §§ 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b). | The modular has two Antenna which comply with the antenna requirement of Section15.203.                       |
| The module must demonstrate compliance in a stand-alone configuration.                                                                                                                                               | The modular was tested in a standalone configuration apart from host units.                                   |
| The module must be labeled with its permanently affixed FCC ID label, or use an electronic display (see KDB Publication 784748).                                                                                     | The modular has its own FCC ID number.                                                                        |
| The module must comply with all specific rules applicable to the transmitter, including all the conditions provided in the integration instructions by the grantee.                                                  | Yes, This module (STM32H743VI) meets the required conditions                                                  |
| The module must comply with RF exposure requirements                                                                                                                                                                 | Yes, when this module is used, it complies with the requirements for radio frequency exposure.                |

## Integration Instructions for host product manufacturers

The following items are submitted in support of application for Modular Transmitter FCC ID as noted above as required by the FCC KDB 996369 D03 OEM Manual v01.

These items are provided as integration instructions for host product manufacturers (e.g., OEM instruction manual) to use when integrating a module in a host product.

Any requirements that are not applicable to the Module are as indicated below.

Summary of requirements and Checklist. Refer to the KDB for description of the complete requirements;

| KDB Ref Sect | Requirements of KDB 996369 D03                                | User Manual Page Number reference |
|--------------|---------------------------------------------------------------|-----------------------------------|
| 2.2          | List of applicable FCC rules                                  |                                   |
| 2.3          | Summarize the specific operational use conditions             |                                   |
| 2.4          | Limited module procedures                                     |                                   |
| 2.5          | Trace antenna designs                                         |                                   |
| 2.6          | RF exposure considerations                                    |                                   |
| 2.7          | Antennas                                                      |                                   |
| 2.8          | Label and compliance information                              |                                   |
