To Whom It May Concern

Dear Sir/Madam,

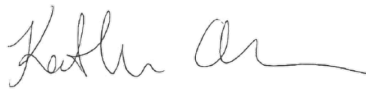

Please find enclosed an FCC part 90 and 15C Class II Permissive Change application for FCC ID S9E123130.

Due to discontinued production of Tx power amplifier component, the following changes were required in TR400900 radio data modem module (S9E123130).

TX power amplifier circuit Qorvo RF6886 (100-1000MHz) and its peripherals have been replaced by Guerrilla GRF5504 (100-550MHz) and GRF5509 (700-1000MHz) and their peripheral bias and matching components.

It has been verified by accredited testing that above changes do not affect radio performance of the product.

Sincerely,

KATHERINE ALLEN
