Troubleshooting

Q1: If the Device Status indicates that the Bluetooth USB Adapter is not working properly, what should I do?

A1: Uninstall **Air2U Bluetooth Device** in **Device Manager**, and reinstall the Bluetooth utility.

Q2: How do I set up connections between Bluetooth devices?

A2: Refer to the User's Guide on the included CD-ROM or to TRENDnet's website for additional information.

Q3: How do I transfer files between my PC and my Cell Phone?

A3: You need to verify that your Cell Phone is "Bluetooth enhanced" and that the software for your phone allows file-transfers. If this is the case, refer to the User's Guide on the included CD-ROM or to TRENDnet's website for additional information.

Q4: What folder do I use to share files between Bluetooth devices?

A4: Double-click **My Documents**, double-click **Bluetooth**, and double-click **share**. All files located in the **share** folder can be transferred to other Bluetooth enabled devices.

Q5: I clicked the orange globe in the Bluetooth utility, but I still could not locate a Bluetooth device.

A5: Make sure that your Bluetooth devices are enabled, and that the TBW-101UB/TBW-102UB is connected to your computer. Then reboot all Bluetooth enabled devices and click the orange globe in the Bluetooth utility.

Q6: I cannot pair two Bluetooth enabled computers after typing a password. What do I do?

A6: Try using a simpler password with 3 characters such as 123, and see if you are able to connect to another Bluetooth enabled computer.
