Note: (Insert pictures of icons in front of each menu item)

1 Names

- 1 List
- 2 New
- 3 Search
- 4 Erase All
- 5 Speed Dial
- 6 Send All as vCards

2 Settings

- 1 Ringers
- 2 Profile
- 3 Display
- 4 Security
- 5 Call Setup
- 6 Phone Info
- 7 Phone Number
- 8 Keyguard
- 9 Network Service

3 Tools

- 1 Scheduler
- 2 Alarm Clock
- 3 Calculator
- 4 Tip Calculator

4 Call Logs

- 1 Missed
- 2 Received Call
- 3 Dialed Call
- 4 Erase Lists
- 5 Call Timers

5 Messages

- 1 Write Message
- 2 Inbox
- 3 Outbox
- 4 Templates
- 5 Erase Msgs
- 6 Voice Mail
- 7 Settings
- 8 Multimedia Box

Note: (Type instructions below for each button used to navigate through menus and select menu items.)

To navigate through menus

1. Press  key to navigate.

2. Press  key to enter.

3. Press  to go back.

Chapter 2 Names

Names is a list of your contacts. Each contact can contain three phone numbers, address, email, URL, and note.

You can access it directly after powering on for quick access to your contact list.

1. You can access your contacts through **Menu → Names → List → ▲** and **▼**.

Using the Keypad to Enter Information

You can use the keypad to enter information. There is a cursor, which looks like  at the right side of current character.

To enter text

1. Press alphanumeric key to insert text before cursor.
2. If you make a mistake, press  for **Erase** to delete current character before the cursor.
3. Use  and  to move cursor.
4. After editing, select **Save** to save your editing.

5. To cancel editing, long-press  key until key function changes to **Back**. Press  again.

To enter numbers:

1. Press **#** until **123** is displayed at the top-right corner of the screen.
2. Press numeric keys to input numbers.

To enter uppercase or lowercase letters:

1. Press **#** a couple times until **abc** is displayed at the top-right corner of the screen and input **lowercase** letters.

2. Press **#** a couple times until **ABC** is displayed at the top-right corner of the screen and input **Uppercase** letters.
3. Press **alphanumeric** key several times (no longer than 0.5 seconds between each two pressings) to enter a particular letter written in the key.
4. If the cursor is hidden, keep on pressing to change current character. Current character will be entered when the cursor appears.
5. If you wish to enter a letter that is in the same key, you must wait 0.5 seconds until the cursor appears, so you can press the key again. If you wish to enter a letter that is in a different key, you need not wait for the cursor. Just directly press the key as you wish.

To enter symbols or special characters:

1. Press .
2. Use ▲ and ▼ to select the symbol you need.
3. Press the corresponding number key to select the symbol you want.

To change the language:

2. Reset from another language you cannot read: **Menu → press in 5,3,3.**

Entering and Editing Contacts

To add a new contact:

1. At **Menu** press  for **Names** → ▼ for **New** → **Select**.

2. At **New Contact** make selection and enter contact data → **Save** and enter contact name → **Number Type**

To view list of names:

1. **Names** → **List** → scroll ▼ to view entire list.

To edit a name:

1. **Names** → **List** scroll ▼ to select contact you wish to edit → **Options** → scroll ▼ → **Edit** → **Change** → **Save**.

To find a name:

1. **Names** → ▼ → **Search** → enter the full name you wish to search → **Find**

To erase a Name:

1. **Names** → **List** → select one contact in the list → scroll ▼ → **Erase** → **Yes** or **No** to confirm.

To erase all contacts:

2. **Names** → ▼ → **Erase All** → ▼ → **Erase** → **Yes** or **No** to confirm.

Creating and Using the Speed List

Assign numbers 2 to 99 to contacts in to Speed Dial. Then you can use short numbers such as long pressing 2 or 2# to dial quickly.

To add/edit a phone number to the speed list:

1. **Menu** → **Names** → ▼ → **Speed Dial.** → ▼ → select an empty short number → **Options** → **Set Entry**.

2. **Search Names** → ▼ → select one contact → select a contact phone number. the contact number is now saved to **Speed Dial**

To make a call to a number on the speed list:

1. **Menu** → press and hold the **Speed Dial** number or press the **Speed Dial** number along with **#** .
The long contact number will appear.

To delete one or all numbers on the speed list:

1. **Names** → ▼ → **Speed Dial** → **Options** → ▼ → **Erase All** → **Select** →
Yes or **No** to confirm.

Using the vCard - VCard exchange

The vCard allows you to exchange phonebook entries via SMS with others whose handsets support Smart Messaging.

Set Reception Mode

The handset supports two vCards reception mode, On phonebook or Prompt.

On phonebook means when you receive a new vCard, the handset will save the contact information directly onto your phonebook. If the entry with the same contact name exists already in your phonebook, it will be overwritten without prompt. After the contact information has been saved to phonebook, the vCard received will be deleted.

“Prompt” means the handset will prompt for a new vCard’s incoming. The handset will display instead. You have a choice of reading the message immediately by pressing “View” key or reading it later by pressing “Back” key. When you press “View” key, the display will show the content of the vCard message (if there is only one unread vCard message.) If there are multiple unread messages, the display will show the vCard message list. popup a dialog to ask you whether read the message right now, and your phone sounds, and  is shown on the display. If you have both unread SMSs and vCards,  is shown on the display instead.

Your phone holds up to 120 vCards.

Read vCards

If your phone is turned on when it receives a vCard, your phone sounds an alert or vibrates and  is shown on the display. If you have unread SMSs,  is shown on the

To read a vCard:

Menu → Messages → ▼ → Multimedia Box → select vCard

If a vCard message is unread, there is a  flag before the item in the message list. Otherwise, the flag is .

1. You can select a vCard by scrolling with the ▲ and ▼ keys and pressing **Options** to choose **View**. The vCards shown are sorted by the time they were received.

2. You can read the vCard content by scrolling with the ▲ and ▼ keys.

3. If you want to save the vCard's contact information, press **Save**. If a contact entry with the same name exists, your phone will prompt to ask you whether to overwrite the existed entry.

To send a vCard:

You can send a vCard through your phone.

To send a vCard:

1. **Contact** → ▲ and ▼ → select contact entry.
2. **Options** → **Send as vCard** → **Select**.

- All contact details will list on the display, each with a check box. You can select a detail to send by scrolling ▲ and ▼. Press **Options** key to add/delete it into/from to-be-sent data, or add all details into to-be-sent data by selecting **Un/Select**, **Select All** menus.

- When you finish selecting the details to send out → **Options** → **Ok** → **Select**. You can input addresses that will receive the vCard. You also can → **Options** → **Search** menu to select a contact entry to send vCard to. The selected contact's mobile phone number will be displayed.

- If the contact entry is set to **Private**, you must enter the correct lock code before you send the vCard.

- Send out the vCard via SMS by → **Options** → **Ok**. Your phone will send the vCard to the address you have inputted.
- If the vCard has been sent to an address successfully, your phone will display **Message Sent!**.

To send entire phonebook:

You can send your entire phonebook via vCards. To make a batch-send:

Menu → **Contacts** → **Send all as vCards**.

- Input the address to where you want to send the phonebook. Press **Send** key. You can only input one address to make the batch-send.
- Your phone will prompt to ask you whether you are sure to make the batch-send.
- Ok** → **Send vCards**.

Sending means the current status is sending.

2/3 means the phone is sending the second contact entry in phonebook.

Success! means the previous contact entry in phonebook was sent out successfully. If there are errors in sending, your phone display message, **Error, resend 1**.

Your phone will try to resend the vCard up to 10 times. If the vCard can't be sent successfully in the end, this batch-send will be paused. You can continue this batch-send by pressing Continue key. You can manually pause a batch-send by pressing Pause key.

You can break a batch-send by pressing the **Break** key.

To delete vCards;

You can delete vCards one by one or delete all vCards at once:

1. When you read vCards, select the vCard you want to delete by scrolling ▲ and ▼. If you want delete all of the vCards, select any one vCard.
2. **Options** → **Erase** if you want to delete this **vCard**. Select **Erase All** if you want to delete all of the vCards. Press **Select**.
3. Your phone will prompt to confirm erasing the vCard or erasing all the vCards.

4. Press **Ok** key. The vCard(s) will be deleted.

Chapter 3 Messages

This chapter introduces the usage of Short Message and Ring Tone.

Using Short Message

You can use Short Message function to send and receive message. There is an Inbox and Outbox in your phone. Inbox and outbox can hold a maximum of 60 messages. Each message can contain a maximum of 160 characters. You can send the message now or later.

To check for received text messages

1. When a new message comes, you will be noticed by means what you set at

Setting → profiles → message prompt → You have 1 new message! will be displayed on screen.

2. Press  to select **View**.

Note: When you have a new message, an icon in idle screen to appears.

Note: If your message memory is full, the icon will change to .

To read a text message

1. **Menu → Messages → Inbox** and select message.

To erase a text message

1. Select the message → **Option → Erase**

To send a text message

1. **Menu → Messages → New Message → Options → Send** to edit the address → **Options → Ok** to send message

To send a text message to several addresses

1. **Send Text Message** → **Option** → **Group** to send the message to several addresses → **Select** to select number from contact list.

2. **Options** → **Select One** to select focused address, or **Options** → **Select All** to select all addresses. The maximum number of addresses allowed in a group at any one time is 10.
3. Select **Options** → **Send** to send message to selected address.

Ring Tone module is used to manage the rings downloaded via Short Message. It includes functions of playing ring, deleting ring and renaming ring title.

Using Ring Tone

To Download a Ring Tone:

The Tornado phone can only receive ring tones through SMS messages in midi format. However, the process in downloading ring tones to the handset varies and is carrier specific. For more details as to how to download a ring tone in your specified country, please refer to the Appendix.

Browse All Rings

Browse all the rings downloaded via SM.

To browse all ring downloaded via Short Message

1. **Menu** → ▼ → **Messages** → **Multimedia Box** → **Ringtone** browsing all the rings by ▲ and ▼.

Manage rings

To play, delete and rename rings downloaded via short message.

To play a ring

1. **Menu → ▼ → Messages → Multimedia Box → Ring → ▲ ▼ → Option → Play.**

Using the Alarm Clock

To set the alarm time

1. **Tools** → **Alarm Clock** → **Options** → **Set** → set alarm time → **Done**

To turn off the alarm

1. **Tools** → **Alarm Clock** → **Options** → **Disable**

Using the Calculator

Calculate

1. **Tools** → **Calculator** → enter number → **Options** → select a function → enter another number → **Options** → scroll ▼ to **Select** = to get the answer.

Using the Tip Calculator

To calculate a tip

1. **Tools** → **Tip Calculator** → enter bill amount → **Next** → scroll ▼ to select the rate percentage → press  for result → **Option** → **Split** to split the tip payment.

Chapter 7 Keypad Service Provisioning

This is a hidden menu. You can enter it by pressing ‘#*0204’.

This feature is protected by SPC1. The default is “111111”.

Program NAM1, NAM2, or SPCs

Select the menu “Service Program” and press “Select” key.

After inputting the SPC2, NAM1 or NAM2 can be programmed. The default is “222222”.

To program NAM 1

Select NAM 1

There will be many parameters to be input one by one. The next will bring up when you press “Ok”, and the value you input will be stored. You can back to the previous parameters by pressing “Back” key.

The MIN Lock is set to “Enable” as default. When you input a new MIN, it must meet the criteria stored in the MIN Lock table. Otherwise the phone will prompt “Invalid MIN!”.

If you want to change the MIN Lock setting, you must input SPC3 firstly.

The SPC3 is “333333” as default.

To program NAM 2

Select “NAM 2”. The program procedure is almost the same as for NAM 1.

To change SPCs

Select SPC

You can change SPC1 or SPC2 and set the max tries of SPC1 or SPC2.

The phone will reboot when you exit the Service Program Menu.

Abbrev.NAM

You can program with the active NAM. The following parameters can be changed: MIN, MDN, Home SID, Primary CH A and Secondary CH A.

The phone will reboot if you changed any parameters.

System NAM Setting

To select preferred

Select the preferred for the active NAM.

To set the active NAM

You can set which NAM to be activated. If the current active NAM is locked, you must unlock it before you set the other NAM to be active.

To lock/unlock the active NAM

The phone will reboot when exiting the System Menu if the preferred or active NAM has been changed.

Test Screen

This menu will display some system parameters such as Rx Power, Tx Power, Pilot Pn, EC/IO, etc. While the test screen is active, you can dial a number and end a call through the keypad. When in a call, the test screen will be taken to the front to show the parameters.

Factory test mode

This is also a hidden menu. Enter menu by pressing “#*0203”.

Note: You can quit 'Keypad' test by pressing right soft key twice.

Chapter 8 Health and Safety Information

Exposure to Radio Frequency (RF) Signals

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission (FCC) for the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on the safety standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies.

The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The exposure standard for wireless phones employs a unit of measurement known as Specific Absorption Rate (SAR). The SAR limit set by the FCC is 1.6 W/kg.¹

SAR tests are conducted using standard operating positions specified by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output of the phone.

Before a new model phone is available for sale to the public, it must be tested and certified by the FCC to insure that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on body) as required by the FCC for each model. While there may be differences between SAR levels of various phones and at various positions, they all meet the government requirement.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found on the FCC website (<http://www.fcc.gov/oet/fccid>) after searching the FCC ID printed in the label on the phone.

The highest SAR value for this model phone when tested for use at the ear is 1.49 W/kg; and when worn on the body, as described in this user guide, is 1.303 W/kg.

¹ In the U.S. and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

For Body Operation

To maintain compliance with FCC RF exposure requirements, use only belt-clips, holsters or similar accessories that maintain a 1.5 cm separation distance between the user's body and the back of the phone, including the antenna, whether extended or retracted. The use of belt-clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
