

Artemis Phone User Manual

Introduction

Congratulations on your purchase of the advanced and compact Artemis cellular phone, designed to operate with the latest digital mobile communication technology, Code Division Multiple Access (CDMA). Along with the many advanced features of the CDMA system such as greatly enhanced voice clarity this phone offers:

- Large, easy-to-read, 8-line backlight color LCD with status line.
- Paging, messaging, voice mail, and caller ID.
- 24-key keypad.
- Long battery stand-by and talk time.
- Menu-driven interface with prompts for easy operation and configuration. Any key answer, auto answer, auto retry, one-touch and speed dialing with 200 memory locations.
 - Support multiple languages (English, Spanish and Portuguese).

INFORMATION TO USER

You must sign up with a wireless service provider and subscribe to the service of your choice. Your service provider will describe its services and instructions for using them. This device is an automated self tuning and power adjusting radio that interacts with the service provider base station operating in the CDMA frequency band and does not require user intervention to operate the tuning or the power adjustment

Important information

This user's manual provides important information on the use and operation of your phone. Please read all the information carefully prior to using the phone for the best performance and to prevent any damage to or misuse of the phone. Any unapproved changes or modifications void your warranty.

Getting Started

Phone Components

The following shows key components of your mobile phone.

Using the Battery Pack

Note: It is important to charge the battery fully before the initial use of the phone.

The phone comes with a rechargeable battery. Keep the battery charged while not in use in order to maximize talk and standby time when using the phone. This phone will only operate with the battery provided with the phone, or from a authorized retailer.

Installing the Battery

To install the battery, insert the bottom of the battery into the opening on the back of the phone. Then push the battery down until the latch clicks.

Removing the Battery

Turn the power off. Lift the release latch to detach the battery

Battery Charge Level

The battery charge level is shown at the top right of the LCD screen.

When the battery charge level becomes low, the low battery sensor alerts you in three ways: sounding an audible tone, blinking the battery icon, and displaying **LOW BATTERY WARNING!** If the battery charge level becomes exceedingly low, the phone automatically switches off and any function in progress is not saved.

Battery Information and Care

1. Never use an unapproved battery since this could damage the phone and / or battery and could cause the battery to explode.
2. The battery does not need to be fully discharged before recharging.
3. Use only VITELCOM approved chargers specific to your phone model since they are designed to maximize battery life.
4. Do not disassemble or short-circuit the battery.
5. Keep the battery's metal contacts clean.
6. Replace the battery when it no longer provides acceptable performance. The battery can be recharged several hundred times before replacement.
7. Recharge the battery after long periods of nonuse to maximize battery life.
8. Do not expose the battery charger to direct sunlight or use it in areas of high humidity such as a bathroom.
9. Battery life will decrease if exposed to extreme hot or cold temperatures.
10. Battery life will vary due to usage patterns and environmental conditions.
11. The use of extended backlighting, MiniBrowser, and data connectivity kits affect battery life and talk/standby times.

Accessories

There are a variety of accessories available for your mobile phone. You can select these options according to your personal communication requirements. Consult your local dealer for availability.

Your phone will come with one Travel Charger and one battery.

Optional Accessories: Hands-free headset, data cable.

Using the vCard - VCard exchange

The vCard allow you to exchange phonebook entries via SMS with others whose handsets support Smart Messaging.

Set Reception Mode

The handset support two vCards reception mode, ‘**No Prompt**’ or ‘**Prompt**’.

‘No Prompt’ means when you receive a new vCard, the handset will save the contact information directly on your phonebook, and if the entry with the same contact name exists already in your phonebook, it will be overwritten without prompt. After the contact information has been saved to phonebook, the received vCard will be deleted.

‘Prompt’ means the handset will prompt for a new vCard’s incoming. The handset will popup a dialog to ask you whether read the message right now, and your phone will sound an alert, Your phone holds up to 120 vCards.

To set reception mode, do the following:

- a. Select “Settings” in main menu
- b. Select “vCard”

- c. Select “Prompt” or “No Prompt”.

Read vCards

If your phone is turned on when it receives a vCard, your phone sounds an alert or vibrates. You have a choice of reading the message immediately by pressing “View” key or reading it later by press “Back” key. When you press “View” key, the display will show the content of the vCard message if there is only one unread vCard message. Otherwise, the display will show the vCard message list.

To read a vCard

1. Enter 'Message' and select "8: Multimedia Box".

2. Select "vCard"
3. You can select a vCard by scrolling "↑ ↓" keys and press "Option" to choose "View".
The vCards shown are sorted according to the time they received.
4. You can read the vCard's content by scrolling "↑ ↓" keys.
5. If you want to save this vCard's contact information, press "Save". If a contact entry with the same name exists, your phone will prompt to ask you whether to overwrite the existed entry.

Send a vCard

You can send a vCard through your phone.

To send a vCard;

1. Press "Contact" key in the idle screen, and select the contact entry you want to send by scrolling "↑ ↓"

keys.

6. Press “Option” key, and select “Send as vCard”, then press “Select”.

7. All contact details lists on the display, and each with a check box.

You can select one details to send by scrolling “↑ ↓” keys, and then press “Option” key to add/delete it to/from the list,

or add

all details into to-be-send data by selecting “Un/Select”, “Select all” menus.

8. When you finish selecting the details to send out, press “Option” key and select “Ok” in menu, you can input addresses which will receive the vCard.

You can also press ‘Option’ key and select ‘Contacts’ in the menu to select a contact entry to send this vCard.

The selected contact’s mobile phone number will be displayed.

9. Send out the vCard via SMS by pressing “Option” key, and selecting ‘Ok’ in the menu, and you phone will send the vCard to the address you have inputted.
10. If the vCard has been sent to an address successfully, your phone will display ‘Message Sent!’.

Send all of your phonebook

You can send out all of your phonebook via vCards. To make a batch-send;

2. Press “Contact” Soft key at the idle state, and enter contact menu.
11. Select “Send all as vCards” menu.

12. Input the address you want to send the phonebook to, and then press “send” key. You can only input one address to make the batch-send. You can also use the “Option”

Soft key to find some one in the phone book.

13. Your phone will prompt to ask you whether you are sure to make the batch-send.

14. Press "Ok" key to confirm.

-

15. The send status will be displayed. For example:

Delete vCards

You can delete vCards one by one or delete all vCards at once.

To delete a vCard;

3. When you read vCards,
Select the vCard you want to delete by scrolling "↑ ↓" keys. If you want delete all of the vCards, select any vCard.

16. Press “Option” key, and select “Erase” if you want to delete this vCard, or select “Erase all” if you want to delete all of the vCards, then press “Select”.
17. Your phone will prompt to ask you to confirm to delete the vCard or delete all the vCards.
18. Press “Ok” key, the vCard(s) will be deleted.

Chapter 2: Messages

key.

Set Priority

You can set priority of sent message, and the receiver will know which priority the message is when he read it.

1. Select menu “Priority”.

2. Press up and down key to select the Priority, then press “Enter” key.

Chapter 3: Working with Profiles

A Profile is a group of user defined settings. By switching to a different profile, user can switch all the settings at one time. Currently, the phone will support 5 different profiles.

For example, once you are in a meeting room, you may want to:

1. Switch your ringer to “Vibrator mode” or to a different ringer at low volume
2. Silent or lower the key press sound
3. Turn off or lower the volume of SMS alert
4. Turn off all other alerts
5. Turn on the color LEDs
6. Answer a call differently (select from “Flip Open”, “Any Key” or “SEND only”)

All these settings can be defined by the user to one particular profile. Switching the profile just need a couple key presses.

Selecting a Profile

When enter [Menu], you will find the submenu named [Profiles] which may like the following image.

1. Select [Return] to turn back;
2. Select [Enter] to enter the profiles submenu which may like this:

There are profiles for **Normal**, **Outdoor**, **Car**, **Meeting** and **Silent**. Every profile can be manually changed for your special purpose.

➤ The selected one is marked by a [✓], here the **Normal** Profile is the selected one.

You can select one of them for setting, “Normal” will be used to demonstrate how to work with profiles.

If you chose [**Normal**], you may see:

1. Select [**Return**] to turn back;
2. Select [**Select Profile**] to activating current profile;
3. Select [**Edit Profile**] for edit;

You will see the following menu:

*Note: The bottom line is for displaying the current setting value, here “**Ringer**” indicates the [**Call Mode**] value.*

Edit Profile

When select [**Edit Profile**], you will see the following menu items:

Call Mode : Select the way of alerting when there is an incoming call.

Call Ringer : Select the ringer

Color Status Light : Select the style of flashing LED

Message Prompt Mode : Select how phone should alert when received a message

SMS Ringer: Select the ringer for SMS

Volume: Set volume for ringer, speaker, key beep and alerts

Key Tone : Select between short and long key tones

Alerts: Setting for different alerts

Answer Call: Select how a call is answered.

Select [**Call Mode**]

You will see:

Select [**Return**] to turn back;

Select [**Enter**] on one of them for setting:

Chapter 4: Recent Calls

1. The call history support 3 different categories of call logs. Incoming Calls, Outgoing Calls, and Missed Calls.
2. This information can be contained in 3 separate call lists, each of which is capable of storing the last 10 entries
3. The call history support saving the number into the phone book (if it is not in the phone book).
4. Numbers dialed, regardless of whether the call is successfully connected, must be recorded in the outgoing call history.
5. If there is a record in the phonebook, the display will match the caller's phone number and display the name accordingly.

To List Incoming call

1. From the main menu, select [**Recent calls**].

2. Select [**Incoming**]

select one call history, if number is available, you can press [**Send**] key to call this number

3. Press [**Options**] soft key.

4. Select [**Details**]

If this number exists in contact, the Left Soft Key will become [**View**] for you to view other information of this record.

5. For missed calls, you will see "No Answer" instead of call durations.

6. Select [**Delete**] to delete one incoming call record
7. Select [**Delete All**] to delete all incoming call records
8. Select [**Send Message**] to send a SMS to the selected phone number.

To erase lists

1. From the main menu, select [**Recent call**]

2. Select [**Erase lists**] in recent calls menu

3. Press [**Enter**] to confirm or [**Return**] to cancel.

Check Call Timer

1. Select [**Call Timers**] in “Recent Call” menu

2. Select [**Last Call**] or [**Incoming Call**] or [**Outgoing Call**] in “Call Timers” menu, call duration will be displayed.

3. Select [**Reset**] to clear the call timer.

4. Select [**Timer Reset**] in “Call Timers” menu.

Press [**Reset**] to reset all the call timers to 0, including: last calls, incoming calls and outgoing calls.

Chapter 5: Setting Up Your Phone

To personalize your phone, you can set and view many properties for display, security, network service, call setup, phone info and vCard.

Select [**Menu**] from the idle screen and press “Up/Down” key until you reach the “Setting” screen. Press [**Enter**] to enter the “Settings” menu.

Setting up the Display

Customizing your display by creating a banner, adjusting the backlight, selecting the language, etc.

Creating a display banner

1. Select [**Display**] menu item.

2. Select [**Banner**] menu item.

3. Editing the banner. You may press “#” to switch between numbers, characters and Zi text input.

4. Select [**Save**] to save banner.

Setting backlight Timer

Setting the timer for the backlight.

1. Select **[Display]** menu item.
2. Select **[Backlight]** menu item.

3. Select **[Timer]** menu item.

4. Select an option.

5. Select **[Enter]** to save.

Setting backlight Brightness

Setting the brightness for the backlight.

1. Select **[Display]** -> **[Backlight]**
2. Select **[Brightness]** menu item.

3. Select an option.

Select **[Enter]** to save or **[Return]** to cancel.

Setting the display Screens Wallpaper

1. Select **[Display]** -> **[Screens]**

2. Select [**Wallpaper**] menu item.

3. Select an option.

Press 'Left' or 'Right' key to change image.

Select "Enter" to save.

Note: in idle screen, press “Up”
key can also change the
wallpaper.

Setting the display Screens power on image

Setting the power on image.

1. Select **[Display]** -> **[Screens]** -> **[Power On]** menu item.

2. Select an option.

Press ‘Left’ or ‘Right’ key to
change image.

Select **[Enter]** to save or **[Return]**
to cancel.

Setting the Menu Style

Setting the menu style.

3. Select **[Display]** -> **[Menu Style]** menu item.

4. Select an option.

Select [Enter] to save or [Return] to cancel.

Setting the Theme Colors

1. Select [Display] -> [Theme Colors] menu item.

2. Select an option.

Select [**Enter**] to save or [**Return**] to cancel.

Setting the display language

1. Select [**Display**] -> [**Language**] menu item.

2. Select an option.

Select [**Enter**] to save or [**Return**] to cancel.

Setting the display Contrast

1. Select [**Display**] -> [**Contrast**] menu item.

2. Select an option.

Select [**Enter**] to save or [**Return**] to cancel.

Security

Provide password protection for Lock Phone, Change Code, Reset to Default

Login Security

1. Select [**Security**] menu item.

2. Enter the password, and the default password is "0000".

Lock Phone

3. Select [**Lock Phone**] menu item.

4. Select an option. Selecting [**On Power Up**] will lock the phone next time phone is powered up.

Select [**Enter**] to save or [**Return**] to cancel.

Changing lock code

1. Select [**Change Code**] menu item.

2. Input new password.

3. Confirm password

Select [**Enter**] to save.

Reset Security settings to default values

1. Select [**Reset To Default**] menu item.

2. Select [**OK**] to reset, [**Cancel**] to return.

Network Service

Network Service settings allow user to set CDMA network, call forwarding and call waiting options.

Select [**Network**] menu item

Disable Call Forwarding When your phone is busy

1. Select [**Call Forwarding**] menu item.

2. Select [**When Busy**] menu item..

3. Select [**Disable**] menu item.

4. Phone will dial to setup the service.

Enable Call Forwarding When your phone is busy

1. Select [Call Forwarding] -> [When Busy] menu item.
2. Select [Enable].

3. Input Number.

Select [Send] to start the service.

4. Your phone will start a call for the service.

Disable Call Forwarding If there is no answer

1. Select [**Call Forwarding**] menu item.
2. Select [**No Answer**] menu item.

3. Select [**Disable**] menu item.

4. Will make a call to establish service.

Enable Call Forwarding If there is no answer

1. Select [Call Forwarding] -> [No Answer]
2. Select [Enable]

3. Input Number.

Select [Send].

4. Phone will call to setup the service.

Disable unconditional Call Forwarding

1. Select [Call Forwarding] -> [Unconditional].

2. Select [Disable]

3. Phone will call to setup the service.

Enable unconditional Call Forwarding

1. Select [Call Forwarding] -> [Unconditional].
2. Select [Enable]

3. Input Number.

Select [Send].

4. Phone will call to setup the service.

Disable Call Forwarding when can not be reached

1. Select [Call Forwarding] -> [Unreachable]

2. Select [Disable].

3. Phone will call to setup the service.

Enable Call Forwarding when can not be reached

1. Select [Call Forwarding] -> [Unreachable]
2. Select [Enable].

3. Input Number.

Select [Send].

4. Phone will call to setup the service.

Cancel all Call Forwarding

1. Select [Call Forwarding] -> [Cancel all].

2. Phone will call to setup the service.

Disable Call Waiting

1. Select [Call Waiting].

2. Select [**Disable**]

3. Phone will call to setup the service.

Enable Call Waiting

1. Select [**Call Waiting**] -> [**Enable**].

2. Phone will call to setup the service..

Call Setup

In Call Setup menu, you can setup for the following items:

Auto Answer : Allow the phone to automatically answer the call, or put the phone in answering machine mode.

Voice privacy : is used to encrypt the voice to protect privacy.

Greetings : Select the greetings for answering machine.

Call Guard : Confirm calls on roaming network.

Setting up auto answer

1. Select [Call Setup] -> [Auto Answer]

2. Select an option.

Select [**Enter**] to save.

Setting up voice Privacy

1. Select [Voice Privacy]

2. Select an option.

Select [**Enter**] to save.

Selecting the greetings for answering machine

1. Select [**Greetings**]

2. Select an option.

Select [**Enter**] to save.

Note: To record a greeting, please refer to [**Tools**] -> [**Voice Memo**] -> [**Rec. Greeting**]

Setting up Call Guard

When the phone is on a roaming network, if Call Guard is turned on, it will ask user to confirm making the call.

1. Select [**Call Setup**] -> [**Call Guard**].

2. Select an option.

Select [**Enter**] to save or [**Return**] to cancel

Viewing Phone Information

To view the version of software installed on your phone

1. Select [**Phone Info**] under [**Settings**] menu

2. Will display the related information for the phone.

vCard Receiving Prompt

Set the phone to prompt or not to prompt when receive a vCard.

1. Select [**vCard**] under [**Settings**] menu.

2. Select desired option.

Select **[Enter]** to save or **[Return]** to cancel.

Chapter 6: Using the Tools

The tools menu has many useful tools to convenience your everyday life, including Schedule, To Do List, Alarm Clock, Voice Memo, Calculator, World Clock, and Stopwatch.

Note: Your phone must be turned on to use these tools. Do not turn on the phone when wireless phone use is prohibited or when it may cause interference or danger.

1. Select “Menu” in the idle screen.

2. Select “Tools” in main menu by pressing up/down key or by pressing “4” in the alphanumeric key pad. Now you can use the tools in the Tools menu.

Using the Schedule

You can use schedule to associate an alert with an event.

Note: The alert within the Schedule can not work when the phone is off or there is not enough power in the battery.

To add a schedule

1. Select “Tools” in main menu.
2. Select “Schedule”.

3. Select the day by pressing the up/down key and select the month by pressing the left/right key. The current date is highlighted by a black frame.

4. Select "Options".
5. Select "Add New".

6. Edit the description, then press "Ok".
7. Edit the Alarm by pressing the alphanumeric keys and select the Ringer by pressing the up/down key, then press "OK" to save. You can use the left/right key to exchange the focused field between Alarm and Ringer.

Using the Calculator

Note: This calculator has limited accuracy and is designed for simple calculations.

To use the calculator

1. Select “Tools” in main menu.
2. Select “Calculator”.

3. Enter the number by pressing the alphanumeric key.

4. Enter an operator by pressing the up/down key or left/right key.

5. Enter another number.

6、 Select “Result” to get the result.

Using the World Clock

World Clock provides a useful tool when you want to make a call to people in a different time zone.

1. Select “Tools” in main menu.
2. Select “World Clock”.

3. Select the city by pressing the up/down key.

4. Select “Enter”

Using the Stop Watch

Note: The stopwatch has limited accuracy.

1. Select “Tools” in main menu.
2. Select “Stop Watch”.

3. Enter the stopwatch.

4. Select “Start”, the stopwatch works.

5. Select “Pause”.

6. Select “Resume”, the stopwatch

continues working.

7. Select “Reset” to restart stopwatch.

8. Select “Quit” to exit stopwatch.

Chapter 7: Amusement

This chapter describes how to play the Kongming Chess.

1. Select [**Amusement**] in main menu
2. Select [**Kong Ming Chess**].
3. Select [**Start Game**] to start Kong Ming Chess.

4. Then you can play this game in mission 1.

5. If you quit in during the game, you can select [**Resume Game**] to resume this game,

6. Also you can select game other than mission 1, you may choose any mission from the 30 missions provided. Select [**Select Game**] to select one mission to play.

7. If you don't know how to play, you can read instructions by selecting [**Instructions**].

8. The game rule is as follows:

Use [**Up**]/[2], [**Down**]/[8], [**Left**]/[4] and [**Right**]/[6] to control the cursor. Use [OK]/[5] to select a chessman. When Chessman X moves over Chessman Y next to it, Y will be removed from the chessboard. Only one chessman can be removed at one time. Player wins if there is only one chessman left in the center of the chessboard

Chapter 8 Health and Safety Information

Exposure to Radio Frequency (RF) Signals

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission (FCC) for the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on the safety standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies.

The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The exposure standard for wireless phones employs a unit of measurement known as Specific Absorption Rate (SAR). The SAR limit set by the FCC is 1.6 W/kg.¹

SAR tests are conducted using standard operating positions specified by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output of the phone.

Before a new model phone is available for sale to the public, it must be tested and certified by the FCC to insure that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on body) as required by the FCC for each model. While there may be differences between SAR levels of various phones and at various positions, they all meet the government requirement.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found on the FCC website (<http://www.fcc.gov/oet/fccid>) after searching the FCC ID printed in the label on the phone.

The highest SAR value for this model phone when tested for use at the ear is 1.30 W/kg, and when worn on the body, as described in this user guide, is 0.96 W/kg.

¹ In the U.S. and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

For Body Operation

To maintain compliance with FCC RF exposure requirements, use only belt-clips, holsters or similar accessories that maintain a 1.5 cm separation distance between the user's body and the back of the phone, including the antenna, whether extended or retracted. The use of belt-clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
