Installing the Battery and SD Memory Card

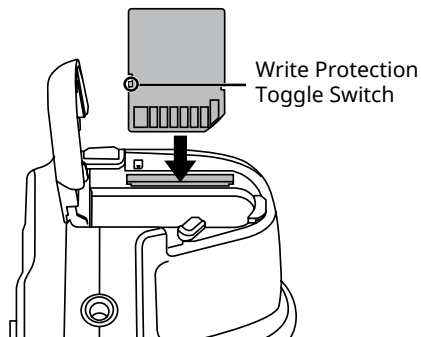

1. Open the battery cover door.

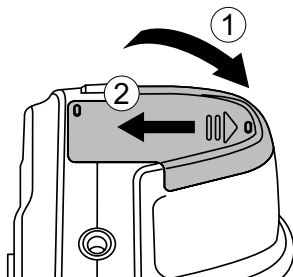

2. Insert the battery into the battery compartment according to the negative and positive directions as illustrated in the picture. Push the battery down until it locks in place.

3. Insert the SD memory card into the memory card slot as shown in the diagram.

4. Close the battery door cover.

 To remove your memory card, open the battery cover door, gently press the memory card to eject it and remove it carefully.

Charging the Battery

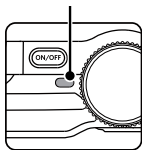

Before you charge the battery, you should turn the camera off and properly insert the battery. Otherwise, there will be no charging prompts after connecting the AC adapter.

1. Connect the camera to the power charger using the supplied USB cable.
2. Insert the plug of the power charger into the power outlet to charge the battery.

Use the supplied power charger to charge the battery prior to use.

Indicator Lamp

Charging indicator:

Steady orange: Charging

Steady green: Charging complete

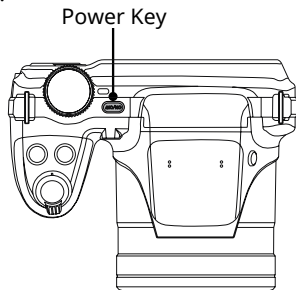

To maximize battery life, charge the battery for at least 4 hours the first time.

Please charge the battery indoors between 0°C and 40°C (32°F and 104°F).

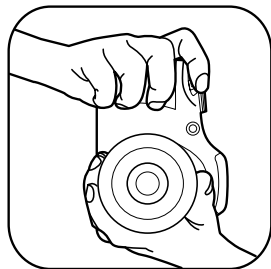

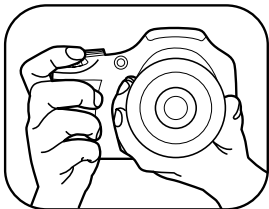

Turning Camera On and Off

Press the Power key to turn the camera on. To turn the camera off, press the Power key again.

When the power is off, press and hold the playback key (⏮) to power on and enter Playback mode.

How to Take Pictures

1. Hold the camera with both hands, being careful to not block the flash and lens with fingers.
2. Point the lens toward the object you want to take a picture of, and then frame it with the LCD.
3. Use the Zoom Lever to select Tele or Wide positions to zoom in or out on your subject.
4. Press the Shutter Key halfway to focus on the subject. When the focus frame turns green, press the Shutter Key down completely to take the picture.

BASIC OPERATION

Using the Mode Dial

This camera provides a convenient Mode Dial that allows you to manually switch between different modes with ease.

Auto Mode

In this mode, the optimal conditions for taking pictures will be set based on the subject and environment. It is the most commonly used mode for taking pictures.

Auto

The camera automatically adjusts the exposure and focus to ensure the best possible pictures.

Landscape

For landscapes, the camera automatically adjusts the exposure to match the background.

Portrait

Most suitable for capturing people with focus on their faces.

Night Portrait

When you take portraits at night or in low light conditions, the camera automatically adjusts the exposure for people and night scenes.

Backlit Portrait

When the sun or any other light source is behind you, the camera automatically adjusts the foreground exposure to produce the best pictures possible.

Night Landscape

For night scenes, the camera automatically increases the ISO value to compensate for low light.

Macro

The macro setting is ideal for shooting small objects or close-up photos.

Program AE **P**

Under different scenes, the user can switch the ISO and EV value according to personal preference, the camera can automatically set the shutter speed and aperture value.

Aperture Priority **A**

In this mode, you can adjust the aperture size, EV and ISO values. The large aperture is to highlight the object focused through blurring the background, while the small aperture is for clear focus on both the background and the object.

Shutter Priority **S**

Setting allows you to adjust the shutter speed / EV value and ISO value. The camera automatically sets the aperture value based on the shutter speed and ISO value to get the most appropriate exposure value.

Manual Mode **M**

This mode is for manually setting the aperture, shutter speed and ISO value.

Movie Mode

Switch to this mode to record videos.

1. Press down the Shutter Key to start recording.
2. Once you are finished, press the Fast Video Recording Key  or the Shutter Key to stop recording and return to the shooting screen.

Time-lapse Mode

Time-lapse Photo

Capture photos at the selected interval.

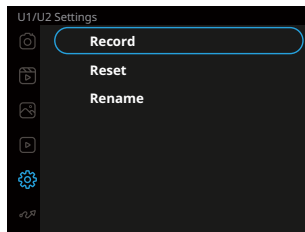

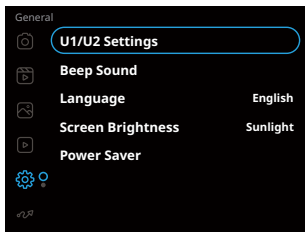

Time-lapse Video

A time-lapse video combines images automatically captured at specified intervals.

U1/U2 (User Define) U1 / U2

The user can store frequently used shooting modes / parameters and switch to this mode for a quick adjustment.

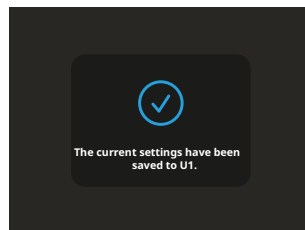

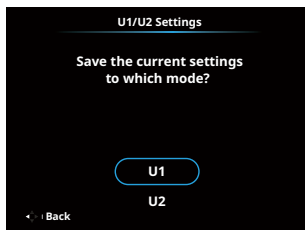

1. Select any mode to be stored. Set your desired parameters in the current mode.
2. Press the  key, press the [▲ DISP] / [▼  ] keys to select  and press the  key to enter the menu.
3. Press the [▲ DISP] / [▼  ] keys to select  and press the  / [► ] key twice to enter the menu.
4. Select [U1/U2 Settings] and press the  / [► ] key to enter the menu.

Record

Save the current mode and parameters in U1 or U2 mode.

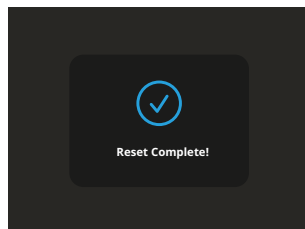

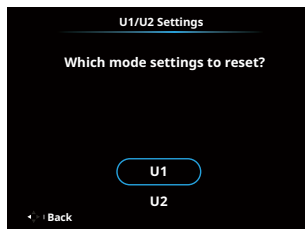

5. Select [Record] and press the  / [► ] key to confirm. Press the [▲ DISP] / [▼  ] keys to select [U1] or [U2] and press the  key to confirm.

Reset

Reset the parameters in U1 or U2 mode.

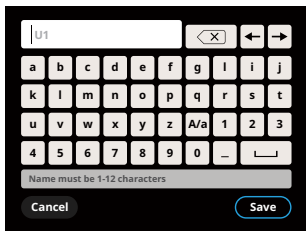

- Press the [▲ DISP] / [▼ ⏻] keys to select [Reset] and press the  / [► ⚡] key to confirm. Press the [▲ DISP] / [▼ ⏻] keys to select [U1] or [U2] and press the  key to confirm.

Rename

Re-enter the U1 or U2 mode name. The mode name can be a combination of numbers and/or letters. It can be up to 12 characters.

7. Press the [**▲ DISP**] / [**▼** ] keys to select [Rename] and press the  / [**▶ ⚡**] key to confirm. Press the [**▲ DISP**] / [**▼** ] keys to select [U1] or [U2] and press the  key to confirm.

Meanings of Interface Icons	
	Delete the last letter
	Switch the display of letters in capital and lowercase
	Move the cursor
	Input space

8. After re-entering the U1 or U2 mode name, select [Save] / [Cancel] and press the  key to confirm.
9. Turn the Mode Dial to switch to the **U1 / U2** and press the  key to enter the shooting screen.

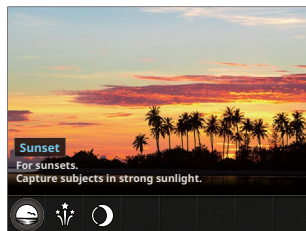

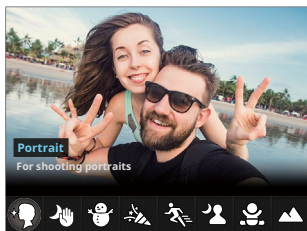

When the **U1 / U2** mode is used for the first time, it defaults to **M** Mode and its parameters.

Scene Mode SCN

You can select an appropriate mode from the 11 scene modes according to the type of environment you are shooting in. The camera then automatically configures the most appropriate settings for the best possible photos.

1. Rotate the Mode Dial to **SCN** and press the EV SET key to confirm.
2. Press the MENU key highlight Select Scene and press EV SET key to enter scene selection.
3. Press the [$\blacktriangleleft$ 🌸] / [$\blacktriangleright$ ⚡] keys to select a scene and press the EV SET key to confirm.
