RE: Confidentiality request for FCC ID: SFX-TMAN

To Whom It May Concern:

This letter serves as an official request for confidentiality under FCC Rule Section 0.459. We have requested that all the schematic diagrams, internal photos, block diagram and operational and technical description required to be submitted with this application be withheld from public review. These named sections contain information that are trade secrets and proprietary. If made public, this information might be used to the disadvantage of the applicant in the market place.

It is noted that the device is sealed with key-type screws to avoid unauthorized access to the inside of the device. The screws can only be opened by a special tool which only authorized personal are supplied with. Further more the screws are fixed with sealing-glue to emphasize the "do not touch" message. Finally it is written in both the user manual as in the general terms of the contract with the customer, that any attempt to access the inside of the device will terminate any warranty agreement immediately.

Please contact me if there is any information you may need.

Sincerely,

Fredrik Tuxen
Vice President
