Pairing headset to your cell phone Pairing is the process of linking the headset with your Bluetooth cell phone. Before you use headset with your Cell phone you must pair the devices. After this process is completed, you can use the headset only with its paired Cell phone. the pairing process only need to be done once for continuous usage. If you wish to use the headset with adfferent cell phone, you must repeat the pairing process with the new cell phone. in this case, the headset will no longer work with the original cell phone. Before you pair the headset, ensure that the Battery is fully charged <u>To pair the devices</u> 1. With the headset turned off, press and hold the TALK button for five seconds. The blue and amber LEDs will flash alternately, and you will hear the PAIRING tone. 2. Release the TALK button. The headset is now in pairing mode. 3. Turn on the cell phone and place it within 10 feet of the headset. 4. Initiate the device discovery feature on the cell phone. Refer to the cell phone user guide for instructions for initiating this feature. 6	5. when prompted by the cell phone, enter the headset pin code 1000. when pairing is complete, the blue LED on the headset will flash at three-second intervals and the headset will be placed in stand by mode, ready to make and receive calls. If disconnection or lost links occur, it may be due to the following reasons: 1. The range over 10 feet between both headset and cell phone. 2. Cell phone to disconnect the link in order to save the power or other purpose. 3. Either device has been switched off. Note: The headset will keep the connection with cell phone at all times if both connection links have been built up. <u>To cancel pairing mode</u> While you are in pairing mode, you can cancel the pairing process and turn off the headset. Press and hold the TALK button for three seconds. Both LEDs will turn off and you will hear the OFF tone. 7
