○ Data Transfer OK ✗ Data Transfer Fail

- There are seven times to resend data. If remote can receive Dongle side ACK before the 7th transmit, the transfer will end.
- If data transfer fail in the 7th time, the system will stop to send data in this time block (17ms). Wait next time block coming, the system will check key data values and then send to Dongle side.
- $200\text{ us} < T1(\text{Random}) < 350\text{us}$
