1.

2.

Basic settings

These settings can be customized as below: DPI, X/Y axis sensibility, Polling rate, Pointer Speed and ACC.

Key settings

3.

Light settings

Lighting effect can be customized as below: Static, Breathing Seven-color Breathing, Neon and Off.
Brightness, speed and color can be customized, you can change the color by adjusting the RGB value or drag the cursor on the color column.
Light can be turned off automatically when it's lying idle, standby time can be set from 0.5 to 15 minutes.

4.

Macro Settings

Click  and type the name under "Macro Name" to create a macro command, click "Record" button and all your keystrokes and button presses will automatically register on the macro screen. When you finish recording your macro commands, click "STOP" button to finish.
The Macro session allows you to input the delay in-between commands. In "Record delay" the delay in-between commands are registered as how it is entered. The "Record delay" uses a predefined time (expressed in seconds) as the delay. And "No delay" omits all the pauses in-between keystrokes and button presses.
The "Insert" button allows you to put in additional keystrokes, button presses or time delays either before or after the selected command. A new display window will appear beside the list of macro commands. You may add in a new set of macro commands by clicking the button on the keystroke menu, or input time delays on the duration time field using the delay menu.

Caution
Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the instructions.

FCC STATEMENT :

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

Radiation Exposure Statement:

The product comply with the FCC portable RF exposure limit set forth for an uncontrolled environment and are safe for intended operation as described in this manual. The further RF exposure reduction can be achieved if the product can be kept as far as possible from the user body or set the device to lower output power if such function is available.
