

Non-Conformities FCC ID: SHU003BU2400 (Ref # E06-000224-1)

The items listed below represent requests for information following review of this application. Further question may arise pending review of responses to these items.

OK	#	Non-Conformity or Comment	Submitted Response	Respondent / Date of Response
	1	Internal photos are insufficient; they do not show adequate clarity for the PCB. Please provide updated internal photos which clearly show component placement with enough clarity to read the silkscreen.	Response: Additional internal photos have been uploaded	
	2	The FCC does not accept full band frequency listings on form 731. Please provide the center frequency of the lowest channel to the center frequency of the highest channel.	Response: The frequency band on the 731 form should be 2405-2480 MHz.	
	3	Page 37 of test report shows a photo with non-standard setup inconsistent with the requirements of ANSI C63.4. Please clarify the purpose of this test setup.	Response: The test report has been revised to remove the photograph of preliminary testing and has been uploaded.	
	4	The antenna gain stated in the operational description does not match that listed in the RF Exposure exhibit. Please clarify the actual antenna gain of the equipment.	Response: Antenna gain is 2.0 dBi.	
	5	Please provide a users manual incorporating the statement required by 15.21.	Response: A revised users manual has been uploaded.	
	6	Please provide users manual statement required by 15.105 since device can be used as a personal computer peripheral.	Response: A revised users manual has been uploaded.	
	7	Please provide documentation of label placement.	Response: Label placement has been uploaded.	
	8	Since this equipment is larger than the palm of your hand, the FCC requires the statement in 15.19 to be attached to the equipment. Please provide an updated label	Response: An updated label has been uploaded.	
	9	This equipment is certified it is therefore not subject to the FCC logo marking. Please remove FCC logo from ID Label.	Response: An updated label has been uploaded.	

10 Antenna options listed in users manual include operation on other frequencies. Please clarify why other frequency information is included for this device.

Response: The user manual that had been sent before is the general catalog of the whole companies' product. Therefore, it has different information about other devices which not necessarily apply to EUT.

11 The RF Output power listed in the RF Exposure report does not match that listed in the Test report. Please clarify how data was obtained for the RF Exposure test report.

Response: A revised RF exposure report has been uploaded.

12 Please confirm the product description listed on form 731 should be "BU2400". This text will appear on the grant of equipment authorization.

Response: Yes the product description should be BU2400.
