

FCC COMPLIANCE STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Tested To Comply With FCC Standards FOR HOME OR OFFICE USE

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.

IMPORTANT NOTE: FCC Radiation Exposure Statement: This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. To maintain compliance with FCC RF exposure compliance requirements, please avoid direct contact to the transmitting antenna during transmitting.

The user manual or instruction manual for an intentional or unintentional radiator shall caution the user that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. In cases where the manual is provided only in a form other than paper, such as on a computer disk or over the Internet, the information required by this section may be included in the manual in that alternative form, provided the user can reasonably be expected to have the capability to access information in that form.

REGISTRATION & WARRANTY

PRODUCT REGISTRATION
Avenues suggests that you register your SwissGear accessory shortly after your purchase. To register your SwissGear accessory, please go to:

LIMITED WARRANTY:
This product is warranted to be free from manufacturing defects for a period of 1 year from the original date of consumer purchase. This warranty is limited to the repair or replacement of this product only and does not extend to consequential or incidental damage to other products that may be used with this unit. This warranty is in lieu of all other warranties expressed or implied. Some states do not allow limitations on how long an implied warranty lasts or permit the exclusion or limitation of incidental or consequential damages, so the above limitations may not apply to you. This warranty gives you specific rights, and you may also have other rights which vary from state to state. If unit should prove defective within the warranty period, contact us with your proof of purchase/date at the following:

FEATURES

- Illuminated Power Light
- Thin and Sleek design
- Play your iPod wirelessly through your car stereo
- 3 Easy to use station pre-sets can be selected and stored
- LCD to show tuning range 88.1 to 107.9 FM stations

OVERVIEW

This SwissGear by WENGER GA-6210-15 Universal FM Transmitter allows you to connect your iPod wirelessly to your car stereo. This device uses the auto adapter for power and is correctly connected when the LED indicator is illuminated. Select a station on your car stereo and simply select the same station on the transmitters LCD display, press play and start enjoying your music library out loud!

INSTALLATION

Connecting to the iPod:

1. Plug the Car Stereo FM Transmitter connector into your iPod. (1)
2. Plug the Car Stereo FM Transmitter power adapter into your car's 12V accessory outlet. (2)
3. Choose your station by pressing one of the 3 preset memory buttons (3) (see **Setting "Favorite Station" Preset Buttons**).

4. Tune your FM radio to the same channel as indicated on the Transmitter LED. (4)
5. Press the "Play" button on your iPod. (5)
6. Use your car radio's or iPod's volume knob to adjust sound level.

Setting "Favorite Station" Preset buttons:

FM Transmitter features 3 programmable "Favorite Station" memory presets. Left (1+), Middle (2) & Right (3 Set). Select stations on your car stereo that are "quietest," i.e. the most free of strong radio station signals. These may change depending on where you are. To program:

1. Press and hold button 3 (Set) for 1 second. (6)
2. Press buttons 1 or 2 to scroll and select stations up or down. (7)
3. Select station, press & hold any button for 1 second to set memory. Confirmation will display as 1, 2 or 3. (8)
4. Press buttons to recall your preset stations. Set more stations by repeating steps 1 through 3.

Note: While in "station selection" mode, if station is not set within 10 seconds, device automatically reverts to "Preset" memory mode, temporarily keeping your present station.

IMPORTANT

- Experiment and select the channel that offers the least interference and the clearest sound.
- Select a channel not occupied by a strong local FM radio station.
- Due to antennae locations, certain cars may have difficulty receiving clear signals.
- Vehicles with windows containing a metallic film may have difficulty receiving clear signals.
- Momentary interference may occur due to signal bounce around buildings or hills.
- Steel structures may act as an antenna, strengthening or weakening a signal. You may have better reception when you are away from the structure.

FOR YOUR SAFETY: Connect your Wireless FM Transmitter BEFORE operating the vehicle.

TECHNICAL SPECIFICATIONS

- High-quality stereo audio
- Full range of FM stations, from 88.1 to 107.9
- 3 "favorite station" programmable presets
- Digital LED station display
