Re: FCC ID: SK9CAT3

To Whom It May Concern:

The following application is submitted on behalf of our client, Itrn Inc., for evaluation of their model CAT3 for a new certification under FCC Part 15.247. Device is a WiFi depopulated version of FCC ID: SK9CAT1 and is referencing the frequency hopping data from that filing as it is electrically identical. Spot check data is also included in this filing.

I have reviewed the application and supporting documentation and have found them to comply with FCC requirements. I recommend this application for certification.

Yours sincerely
